Thread: [\[YouLikeHits\] TEST YouTube Viewer Script ** FREE - NO SURVEY - NO TRASH**](#)

sYNK1337 - January 13, 2013, 2:16 pm

Hey guys! I recently made a really simple and working Sikuli Script that views YouTube videos on YouLikeHits by itself.

It's not a ProBot that has other settings or is super fast, though it should help at least some of you!

Sikuli is downloadable as freeware: <http://adf.ly/HHZlv>

Download the Sikuli Script: <http://adf.ly/HHZYe>

VirusTotal: <http://adf.ly/HHa4X>

(Sorry for the Bees)

How To Do It Spoiler ([Click to View](#))

Go To Go to: <http://www.youlikehits.com>

Click on "YouTube Views" on your left side

Open Sikuli and press "Start"

Now leave it open, you cannot do anything while it is running. (run it while you're at sleep)

If you already know how Sikuli works, just write it like in the screenshot:

Script is not working for me :O

I am a on mac

Works Great thanks for share!

ThePharmacist - January 14, 2013, 3:31 pm

I tried it and couldn't get it working, it was giving me some errors related to being unable to find a file.
