Thread: [\[Dark\] HackForums Styled Avatars \[All in thread!\]](#)

Zealotry - January 14, 2013, 6:19 pm

Hello, fellow HackForums members.

I have been designing several avatars for your use. These were designed with HackForums in mind and blend perfectly with the theme.

I will be constantly adding more! If you have a request for an avatar, please feel free to PM me. I am also considering animating some.

To get any of these, right click one and save image as, or simply copy the image location and paste that in your User CP.

I'm not requiring you to post here and wait for the images, so please simply click [here](#) to say 'thank you' and keep this thread alive!

Color picker, look @ hex.

ryoh - January 14, 2013, 7:13 pm

I won't be using those, but I hope it is useful for other members.

I know. It's saying the same thing for me but looks different from the background. Thank you for notifying me, though. I'm updating them.

vampiro - January 14, 2013, 7:20 pm

They look perfect now. Good job OP. Make a debian one and I'll definitely use it.

Fetish - January 14, 2013, 7:28 pm

I've got a few different ideas you may want if you don't have them already.

360/PS3 logos, tumblr, facebook, spotify, steam, raptr (though it may not look right, not sure), all I have so far. Will definitely be using these. Excellent job ?

Just wondering (since I see a few people bringing up the topic of HF's background color) do you plan on making transparent sets? I'd probably end up using some of these on other websites as well.

Just a thought.

Make them a bit darker so they are more visible.

Also add some more shapes, not just company logos.

They were intended to look engraved, which is why they're the shade they are now.

I will likely add a yin-yang and some more shapes shortly.

Natas - January 30, 2013, 12:03 am

ZealotryYep engraved, try engraving something on a wooden table and you'll see that the part you engraved looks darker because of the less amount of light coming in.

Dextraction - January 30, 2013, 12:26 am

Hackforums is not made out of wood. I appreciate your feedback, but I definitely disagree. ?

ZealotryIts just an example, try engraving anything.

When you engrave means you push inside thus you lose light, it's not a matter of opinion it's what right.

Of course your free to do what you like, I'm just giving feedback.
