Thread: [Firewall / Antivirus test / Review \(2012 / 2013\)](#)

Fluxbomb - January 14, 2013, 7:49 pm

Here are some reviews to check out what firewalls have gone through testing and which have done a good job...

Cool little white paper...

https://www.sans.org/reading_room/whitepapers/auditing/conducting-penetration-test-organization_67

Small toolkit...

<https://pentestlab.wordpress.com/toolkit/>

Firewall Tests

<http://www.matousec.com/projects/proactive-security-challenge-64/results.php>

Antivirus Tests

<https://www.virusbtn.com/vb100/RAP/RAP-quadrant-May-Dec12-1200.jpg>

http://www.anti-malware-test.com/test-results/Active_Malware_Treatment_Test_2012#part2

<http://www.opswat.com/about/media/reports/antivirus-december-2012>

Hope this helps a tad regards to better security and helping yourself choose whats best for you.

Current firewall I really like is "Privatefirewall 7.0"

https://www.privacyware.com/personal_firewall.html

Reason why is I think Comodo firewall is too chunky, and it has so many pop ups from defence+ and the other crap.

It's a good firewall, I just don't like to you it

Privatefirewall used to be a paid for firewall but is now free
