The idea is great, but did you just get the code of all the themes and add them to a class that is generated? I cant think of any other way you would do that. Just wondering. Amazing idea but a lot of those themed controls wont look good together. However, please remove the survey link. You wont get money from that. Just mere cents. nyaa

sorry4this - January 15, 2013, 7:53 am

Agree, idea is great but survey sounds like you wat get a money for free themes
This is not good

IMHO

TheAnonymous - January 15, 2013, 8:37 am

Yes. You are making money of other people's themes. Please remove the survey link.

Love the idea, but the UI could be improved, in my opinion. The font used isn't the best and the preview images are stretched and pixelated; that or the pictures on the thread are stretched. But I love the idea! ?

New version is ready to release within a couple of days .Use custom UI in next update + the pictures on the thread are streched.

The idea is good but the way you did it was extremely poor nyaa. You didn't generate anything nyaa. All you did was use already made buttons and when you click generate nyaa, it copies the button design code that's it nyaa.

A true version of this software will be able to change colors, add style, hue, effects, animation etc dynamically, not from remade controls nyaa.

version 2.0 is gonna see sunlight very soon with the above features. :D

I approve of the fact that you give credit for my themes, but I don't like it that you're earning money with work that you didn't make yourself.

Remove the survey or donation begging and it's fine for me, or simply remove my themes from the program. Once again you didn't ask for permission to use them anyways.

4RG0S - January 15, 2013, 12:15 pm

Great Tool i will download definitivly :)

Percocet - January 15, 2013, 12:17 pm

I don't give a fuck how good or terrible it is... If I can make it manually, I'm sure as hell not doing a fucking survey for this.

Zalg0 - January 15, 2013, 12:37 pm

Cool program. But now you are just "making money" with things you did not create yourself.
