eBay Listing Optimization Service!

Quickly before I tell you what this service is I would just like to tell you about myself. As you can see i'm new to this forum, but don't be deceived, I am an avid poster on pretty much all marketing forums on the net and a big seller on WF. I am also earning £12K a year from selling on eBay. I'm 16 years old. I was earning a bit of money from eBay a year ago by buying and selling gaming products but I wanted a way to boost my sales so, with my knowledge of programming and some contacts I was soon running a (secret) programme in conjunction with big eBay shops and sellers and eBay itself. Now, 1 year on my earnings have increased massively using just one programme. This is the reason I have come here to advertise and sell my service and hopefully help you guys earn 50-200% more on eBay.

Okay, now that is out of the way I will tell you all what this service exactly entails. It is a 7-25 page report of a selected product on eBay. I will go into enormous detail giving you statistics, tips and tricks to help sell your product and boost your profit. In the report will be everything from what day is best to end your listing on, what keywords are best to put in the title, what category sells most, the list goes on. Take a look at some of the screen shots below to see examples. Each aspect of the product I look at and review comes with statistics and graphs to help you even further.

Some features of the report:

Average selling price

Listing success rate

What Category to list your item

What day to end your listing

Which listing enhancements to use

Complete statistics on sales prices

Other sellers statistics (See you competition)

And MUCH, MUCH MORE!

Being an eBay seller myself I know how annoying getting extra competition is, so to make sure nobody knows your intended product, post here that you have payed and I will PM you asking for

your product that you want your report on and instructions to show proof.

To your success -
