Thread: [Need automated digital shop script with Liberty Reserve/PayPal...](#)

aSmoo - January 16, 2013, 12:46 pm

Hey guys,

I want to open a digital shop for my accounts, emails, keys and other stuff.
I need it to support Paypal, Liberty Reserve and possibly other type of payments.

Could you please suggest/give me a good script?
It can be a wordpress plugin as well.
I am up to pay 15-20\$ for it as well.

Maybe you can link me to some sites where I can buy it?

Thanks.

Do you want a template, is that what you mean?

No I don't need a template, I need a working shop script.

Something like this : <http://codecanyon.net/item/universal-digital-shop/2987770>

I was about to purchase it but I am not sure about the support the guy gives.

Read the comments.

It looks like his support isn't that good.

Here's a free WP plugin that supports LR and PP.

<http://wordpress.org/extend/plugins/wpstorecart/>

lockster - January 16, 2013, 4:13 pm

I have a php script for LR processing if you are interested :)
