(Mar 16, 2010 06:53 PM)Razzle Wrote: [\[CITE\]](#) I just updated now and it looks freakin amazing. The GUI looks really nice, every option on the logger is explained for new people wanting to gain experience. The feature I found to be the best is the hot words, this feature is awesome if you want to log something specific like runescape etc. The logs come in amazing with correct words and the ScreenShot and webcame capture works like a charm. The rest of the options like assembly and fake error messages are pretty much essential and I am glad they have been put into this logger. Overall: I think this is an amazing keylogger and probably the best on the market!

Was talking him to him because of an issue with the runescape FTP and saw this in his msn copy.

Like everyone else in here the fucking hot words is amazing. You literally can't describe it with words.

Another thing i liked is how neat the logs are formatted.

looks great and good luck selling

lol any reviews? =p

Beaver - March 16, 2010, 4:30 pm

I Will let 1 Ub3r Review it for free

PlaySkool - March 16, 2010, 4:36 pm

can it be me? im kind of new and unknown, so i won't be surprised if i can't, but i have decent rep with the exception of iintens' -3 for getting raged. if not ill buy it after it gets a few good reviews.

Adding Site Blocker, Data.db Recovery, and a couple of other things in the next couple of days. Also making a small site to help people with transactions and stuff

shaddy@123 - March 17, 2010, 12:26 am

Looks too cool.

Hoep you get alot of customers.

I think this is coded in VB right?

I have done a small update which includes cookie deletion, anti UAC, and the big thing config/data.db stealing.

data.db can only be sent to ftp and not e-mail

Does this steal firefox/ie/chrome passes?

Nick™ - March 19, 2010, 1:54 pm

This looks promising, please PM me

H3x0S - March 19, 2010, 2:12 pm

Amazing keylogger! I recommend you to buy this!

Ashy - March 19, 2010, 8:21 pm

bump..... this shouldnt be so low down on the pages get it up

billy4545 - March 19, 2010, 8:46 pm

will buy 2 from you i added you to msn... pm me

hacktek - *March 20, 2010, 12:04 pm*

So i take it it doesn't steal chrome/ie/firefox heh

Tren1050 - *March 21, 2010, 11:17 pm*

I have set it to only log keywords but i get random logs every 5 minutes with noting in them.
