Thread: [\[Acc Cracker\]](#) [Apex Cracker](#) [\[Acc Cracker\]](#)

strongboy54 - January 17, 2013, 1:11 pm

Hey there, i just looked at a few tutorials about a program called Apex. All of those tutorials which i found had or were suspected of having viruses.

This software has false positives. It does work and i can verify it.

I am here to provide a Clean version of this software. i have included a link to the official website of the guy who made the program here:

Post here for the link.

i found out that it isnt possible to open that file without an additional ocx file. I have included a link of Apex complete with the ocx file below:

Post here for the link.

and for all the paranoid people out there, here is a virus scan:

[Virus Scan on VirusTotal](#)

Remember this are all false positives. If you do not trust it, do not download it, download it from the official website then. I can verify it is clean. they are all false positives.

It does come up with that you need to update it. I downloaded this 5 minutes ago, so it is up to date, that is if you happen to download the file with the ocx file.

This program should be able to crack accounts on most websites. I am not entirely sure where to find a list of these websites, but i guess you can just try some websites and find out! If you downloaded my link it should log you into to XenForo instantly and there shouldn't be any problems. I found it like that when i downloaded it.

here is a screeny of it.

Please say thank you for this. I spent a lot of effort making this for you guys.

It took me 30 minutes to make this thread, and all it takes is 3 seconds for you to say thanks.

EDIT: Seeing as no one has in the slightest posted a thank you comment, i ask you to post a comment to get the download links.

Wondering, if you can download it from a website why are you providing people your own link?

Not accusing but legitimate wonder.

strongboy54 - January 26, 2013, 4:00 pm

because the website does not include the required ocx files, if you read my thread you would see that my link provides these ocx files...
