TLDR: I am selling a VPN service that runs off of Openvpn.

Openvpn is supported by Apple, Android, Windows and Linux.

It is the preferred way to connect to a VPN as it is very simple to connect.

Buy now to gain access to a very fast and secure VPN at a great low price!

can you portforward on this service, also can I get a trial as its hard to find a VPS that has good connection for me considering I live down south in Australia

Sorry, no trials yet. I Might set something up soon to test it. Portforwarding is causing problems so it is currently disabled.

SomeWhiteGuy - January 26, 2013, 9:23 pm

This looks pretty cool. Might end up purchasing.

TBJA - January 30, 2013, 12:43 pm

I will get this if you let me test it's Anti-DDoS capabilities on Xbox Live, as that is what I will be using it for.

Crash™ - January 30, 2013, 1:15 pm

IF you want to test it then purchase it and test it. Sadly Im not giving out any more free accounts.

TBJA - January 30, 2013, 2:54 pm

How do I know it is DDoS protected? Any way to prove this?

Crash™ - January 30, 2013, 6:40 pm

Each server has their own Cisco ASA firewall. That is how I know. In the off chance that someone does successfully issue a ddos attack then the server will be migrated!

TBJA - January 31, 2013, 12:49 pm

Alright I will get this, PM'ing you now.
