Thread: [How to get Free apps \(No PM's / Surveys \)](#)

guycheap - January 20, 2013, 1:32 pm

Hi Everyone,

This is my tutorial on how to get apps, I only take credit for writing this I did not invent this etc. So lets began:

1. Open your Android Phone and Navigate to Settings > Applications > And checkmark " Unknown Sources "
2. Open up play store and choose what application you would like.
3. Visit <http://www.4shared.com/m/android.jsp>
4. Search your application at the top and enter .apk at the end! (Ex: Next Launcher.apk)
5. Choose any file, And download it
6. Open up the installer & Enjoy!

Transferring Apps from PC > Android Phone : [Here](#)

The colored fonts are a little hard to read in my opinion. Anyway, thanks for the share although it's quite a known method. :)
