Thread: [Putting Apps from Computer 2 Phone \(No PM's / Surveys \)](#)

guycheap - January 20, 2013, 1:46 pm

Hey guys,

This is a continued tutorial for this one: <https://hackforums.net/showthread.php?tid=3192721>

Lets began:

1. Download + Install the Android SDK & Its USB Drivers :

<http://code.google.com/android/intro/installing.html>
http://dl.google.com/android/android_usb_windows.zip

2. Go to Settings > Application > Enable Unknown Sources

3. Go to Settings > SD Card & Phone Storage > Enable, "Disable use for USB Storage"

4. Open up CMD and type the following commands: adb install <1>/<2>

<1> = Path to your APK File

<2> = Name of your APK File

Enjoy!

Again, there is much easier ways but this does work. In a very roundabout way. And not on windows 8.

guycheap - January 20, 2013, 2:10 pm

Im pretty sure it works on Windows 8 and this way is fairly easy, Again I am telling them my way :).
