he posted a different link but the file is the same, i checked hashes. so either both are backdoored or he's lying.

unknown897 - March 17, 2010, 1:59 pm

Thank you, you sir have the brains to do such a thing. Vouch for this guys common sense.

dashoota - March 17, 2010, 2:01 pm

Wow, you should have analyzed it first.

unknown897 - March 17, 2010, 2:01 pm

You are lying, the MD5's are the same.

You used a RAR file! I used an uncompressed exe.

Just for lying, I want to spread the link all over the internet now.

(Mar 17, 2010 01:59 PM)V~I~R~U~S Wrote: [\[CITE\]](#) Iam not lying. The Link he posted, was 4.88 MB. The original Link was 1.88 MB.

I extracted and compared the hashes of the .exe files, perfect match. As for the size yours is packed and his is extracted.

SIM-209986 - March 17, 2010, 2:02 pm

my is not packed. 100%

unknown897 - March 17, 2010, 2:04 pm

He is a liar, he doesn't look at the facts to see that RAR = COMPRESSION.

unknown897 - March 17, 2010, 2:10 pm

Really? Where was it leaked?

Maxaber - March 17, 2010, 2:15 pm

(Mar 17, 2010 02:11 PM)kutmustakurt Wrote: [\[CITE\]](#) I am not telling you that, but yeah 1.3.x is on it's way :P

Hmmm, nice you may always share the 1.3.x here... ;)

?

@OP: Yea, thanks for the Cybergate anyway, will dig it out later. ?

What's the difference between the CyberGate versions? More stability, more features, what?

unknown897 - *March 17, 2010, 4:15 pm*

Bug fixes probably, and that leads to stability. Yes, I am working on obtaining 1.3.x too, I will try to see who I can get it from.
