Click the "Browse" button ad import a list of GT. One on each line

Click check. It will tell you if each one is available or not :)

Hmm :/ not INVALID it just means they are taken... INVALID just means blank lines... everything else it will check :)

If it goes to the left, it is NOT being used. If it goes to the right, it IS available :)

How do I import gamertags?

I Made a .txt with this format:

Code Gamertag1

Gamertag2

Gamertag3

Gamertag4

Gamertag5

But when I import it keeps saying accounts are invalid :/

Goodies - January 24, 2013, 3:29 pm

I am still giving this away guys :D Made 100% BY ME in VB.Net

Exvie - January 25, 2013, 9:24 am

Wow, nice share! Thank you very much for this!

Yeah I'm tired of the post/pm me for the list giveaways. This is what a REAL giveaway should look like

Superkawaii - January 28, 2013, 12:54 am

any of these vpn's have port forwarding ?
