Thread: [Goodies' Giveaways #4 ~ ALL MEMBERS! ~~ UDP Flooder! Drop a Home Connection!](#)

Goodies - January 21, 2013, 10:40 pm

Download:

<https://dl.dropbox.com/u/97325194/Flooder.exe>

Virus Scan:

<https://www.virustotal.com/file/0bd3302a2ef124455dca520fd4ec2744c07334f470392511eb03b10fb89d9b16/analysis/>

Ip: IP address of the victime's home - NOT WEBSITE BOOTER

Port: usually 80 but make sure. Xbl is different. Click "common ports"

Socket: whatever. I do 4000-6000

Packet: high! Just click "max" button. It will put in the maximum file size.

1. It's not for websites. It's for flooding home connections.
2. Make sure you have a large socket and packet size

?MYX - January 22, 2013, 12:51 am

thanks for advance, but the download link not working ...

Yes it is :) there's no 404 or anything. Just copy/paste it into the URL bar if you still can't.

DARK_HORSE - January 22, 2013, 11:25 am

thanks for the giveaway ...!!!

downloaded fyn ...

can i take down a router with this ??{n00b}

can you send me settings for packet size/socket....

thanks again

?

TeachmeHowtoDougie - January 23, 2013, 3:49 pm

Thanks for the give away this is very useful and what port do I hit?

Xepher The Cat - January 23, 2013, 3:53 pm

So what do I put in packet or socket

????A?? - January 23, 2013, 5:06 pm

A free flooder and a direct link on the thread, thank you :)

It's my pleasure man! I love these giveaways :D

Affinity - January 26, 2013, 7:44 pm

Thanks for the giveaway!

I like the no post/PM.

Appreciate the flooder.<3

?

Zoidberg - January 26, 2013, 10:01 pm

Pretty cool, I knocked my friend off a minecraft server really fast.

Just a question, though.

What should I put for socket? I just used the packet size.

.kARAT - January 27, 2013, 12:57 pm

Finally! A simple booter, thanks alot dude ^-^

This is NOT made for booting websites. Made for flooding home connections. This will probably not

bring down many websites.

foxrocks - January 27, 2013, 4:06 pm

hey i have a problem with the flooder =[when ever i start it i lose connection or lag out of the party i have the port at 80 and i've tryed 3075 and the socket at 5000 and max for the packed size please help??

420sativa421 - January 28, 2013, 1:34 am

does this use your own internet/computer to do flood them if so any way to stay anonymous? from what i have read dosing from your own internet is verry bad way to flood because it is easily traceable.

1. Use a PPTP VPN (you can find them in another one of my giceaways)
2. This is NOT for ddosing websites. It is for flooding home connections.

Your welcome :D it really helps out when people comment

imauhzm - February 1, 2013, 9:21 pm

what do i put for the sockets? im confused about that part im not sure i put 5000 on it like your pic and i dont see people getting booted offline please help

Forgiven nT - March 24, 2013, 3:31 pm

There was no point in posting this twice... but gj on the udp flooder.

iZExisT - March 30, 2013, 4:28 pm

Hits hard as F88k, i tested it on my friend. Just learning purposes, i'm not a dick. He was off in seconds.
