Run as admin bro... it just says you do not have permission. RUN AS ADMIN!

Unfortunately still getting the same error.

Help would be appreciated, this seems like a useful tool.

I would try putting it in a different directory. Maybe on your desktop?
Also, just re download it. That fixed another guy's problems.

Both files have always been on my desktop.

I tried re-downloading...

Ignored the warning, downloaded and ran as admin, problem persists.

Great spoofer, Goodies! Works very well. I can't figure out what the blank extension feature does, though, lol.
Thanks!
