Thread: [How to make a Java Driveby Site!Beginner friendly!](#)

TheBlackHat - March 17, 2010, 8:01 pm

ATTENTION THIS IS NOT FUD ANYMORE,IT USED TO BE LOL,SO PLEASE DONT POST ITS NOT FUD WE KNOW :D

Good evening mates.Today I will be showing you how to make a java driveby site that can be effective in spreading your virus.?

1.OK so first of all you need to download these files.

<http://www.multiupload.com/412GI7JK2Q>

IF YOU ARE HAVING TROUBLE DOWNLOADING FROM MULTIUPLOAD DOWNLOAD FROM HERE <http://#.com/files/336439038/Java.zip.html>

After you have downloaded them as they are in WinRAR format extract the folder to your desktop.If you do not have WinRAR it is free to download.

<http://www.rarlab.com/>

2.Now what we are going to do is simply go to <http://fileave.com/> and make an account.After this is complete you are going to upload your virus.

[img]http://img7.imageshack.us/img7/4184/capturewi.png[/img]

3.After this is complete copy your direct download link.

[img]http://img688.imageshack.us/img688/4307/pic2m.png[/img]

4.Now find those files you downloaded earlier in step 1 as it is now time to use them.Open Index2.html with Notepad.

5.Now it is time to edit this file.Now use that direct download link I told you to copy earlier.Now in the screenshot below I will be showing you where to replace these links.NOTE:There are two places to replace.

[img]http://img257.imageshack.us/img257/3759/pic3q.png[/img]

[img]http://img27.imageshack.us/img27/3126/pic4p.png[/img]

We are now done with that part!?

6.Now go to [http:// T 3 5 .COM](http://T35.COM) (no spaces) and make your own account,it is free.Also when your done registering take note you have to check your email and confirm the account to be able to login.Now for the last step.

Upload all the files in that Java folder.There are five files in all.

Now if you setup up your site right it should look like this when you go to it.

[img]http://img3.imageshack.us/img3/2493/pic6la.png[/img]

Well guys you just setup your own java driveby site!?

Please don't leech and say thankyou as it took me an hour to make this.NOTE:You do not have permission to post this anywhere ?

x1n - March 17, 2010, 8:19 pm

Hotlink mirror's down. Thanks for the share :)

TheBlackHat - March 17, 2010, 8:21 pm

(Mar 17, 2010 08:19 PM)Retality Wrote: [\[CITE\]](#) Hotlink mirror's down. Thanks for the share :)

No problem mate, glad to help. Also guys, if you're having trouble and have questions just PM me or ask here.?

Big.Eye - March 17, 2010, 8:21 pm

Wow this is good mate im going to give it a try. Good Work

TheBlackHat - March 17, 2010, 8:22 pm

(Mar 17, 2010 08:21 PM)Big.Eye Wrote: [\[CITE\]](#) Wow this is good mate im going to give it a try. Good Work

No problem, just glad to help.?

ghelatin1 - March 17, 2010, 9:49 pm

Thanks a lot for this mate! Can i have a mediafire mirror please?

Cabin Fever - March 17, 2010, 9:51 pm

Very nice, I was looking for someone to do this for me, but this seems easy enough, lol.

TheBlackHat - March 17, 2010, 9:54 pm

(Mar 17, 2010 09:49 PM)ghelatin1 Wrote: [\[CITE\]](#) Thanks a lot for this mate! Can i have a mediafire mirror please?

Here's a # download link.

<http://#.com/files/336439038/Java.zip.html>

?

Cabin Fever - March 17, 2010, 10:00 pm

Works! You're a God!

ghelatin1 - March 17, 2010, 10:16 pm

Thanks again dude! I'll be working on this later...

Thanks again dude! I'll be working on this later...

ghelatin1 - March 18, 2010, 6:31 am

After they run the file can they be redirected to another site?

Stormchant - March 18, 2010, 8:29 am

Thanks alot, really needed this ?

ParanoiD884 - March 18, 2010, 9:28 am

thanks, good tutorial and easy to understand ^^

TheBlackHat - March 18, 2010, 1:07 pm

No problem mates. Glad to help..

TheBlackHat - March 18, 2010, 5:16 pm

Bump...Tooshort.....

-Darkness- - March 18, 2010, 5:42 pm

Working example with calc.exe

Code <http://derpes.com/javadriveby/>

You can check the exe all you want, it's calc.exe from my desktop.

EDIT:

Demo is now fully working with calc.exe , I will keep it up at OP's request ONLY.

Dresta - March 18, 2010, 5:46 pm

nice tut gonna try it later :)

TheBlackHat - March 18, 2010, 6:17 pm

I can help you setup..?

-Darkness- - March 18, 2010, 6:20 pm

Thanks for this release bro.

shaddy@123 - March 18, 2010, 10:46 pm

Thats a vvery nice thread, and it helped me alot.

I can't thank you enough.

TheBlackMarket - March 19, 2010, 5:39 pm

Thanks Mate! Looks really good. awesome Share.

TheBlackHat - March 19, 2010, 5:40 pm

(Mar 19, 2010 05:39 PM)TheBlackMarket Wrote: [\[CITE\]](#) Thanks Mate! Looks really good. awesome Share.

No problem mate.?

TheBlackHat - March 19, 2010, 9:25 pm

Bump!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!

shaddy@123 - March 19, 2010, 9:44 pm

~~~BUMP! from me!

tooshort

**iTouchu** - March 19, 2010, 10:07 pm

Thanks for the tutorial ^^

**Ruubik™** - March 19, 2010, 11:24 pm

Thanks, looks like I got it working! My first Driveby site :)

**iTouchu** - March 20, 2010, 1:30 am

Thanks for the tutorial!

Can add this bit for the email verification signup with an email from <http://10minutemail.com> ^^

**Jaik** - March 20, 2010, 2:15 pm

I cant upload my virus to fileave. it says it cant find the path, please pm me if you can help!

**iNarb** - March 20, 2010, 4:24 pm

path not found T.T btw how does it fetch passwords and stuff?

**BoomHeadShot** - March 20, 2010, 7:00 pm

Thank you very much:DDD

**ff7827458fkwjf** - March 20, 2010, 7:59 pm

It gives me an error when i try to run or cancel the java applet thing >.>

**TheBlackHat** - March 20, 2010, 8:13 pm

(Mar 20, 2010 07:59 PM)7DividedBy3 Wrote: [\[CITE\]](#) It gives me an error when i try to run or cancel the java applet thing >.>

Its supposed to lol.

**ff7827458fkwjf** - March 20, 2010, 8:17 pm

(Mar 20, 2010 08:13 PM)TheBlackHat Wrote: [\[CITE\]](#) Its supposed to lol.ohhhh lol, but what if you press cancel does that still download the virus?

**TheBlackHat** - March 20, 2010, 8:47 pm

(Mar 20, 2010 08:17 PM)7DividedBy3 Wrote: [\[CITE\]](#) ohhhh lol, but what if you press cancel does that still download the virus?Nope.

**ichinose** - March 21, 2010, 8:47 am

I have a problem.

When I upload calc.exe (just the normal calculator) to test, everything works fine.

But when I upload it with say, virus.exe (edit index2.html too) and I try again, I get the following error:

Cannot initialize Update.exe  
And my virus won't download.

Does anyone know the solution to my problem?

Thank you very much!

**ichinose** - March 21, 2010, 10:04 am

I figured it out.

It was because the VirtualBox I was testing on didn't have .NET Framework installed, therefore it couldn't execute my keyloggers.

Too bad alot of people (read: potential victims) do not have the .NET Framework installed by default :(

**????xT?e??5** - March 21, 2010, 7:16 pm

thanks so much for this. just tryed it out it works nice =]

**TheBlackHat** - March 21, 2010, 10:40 pm

(Mar 21, 2010 07:16 PM)Nemesi5 Wrote: [\[CITE\]](#) thanks so much for this. just tryed it out it works nice =]

Heh,No problem mate.?

**Diamond3x** - March 22, 2010, 2:58 am

Thanks.I will try it out.

**Sweeney182** - March 23, 2010, 2:19 pm

I'm hoping this will work out nicely for me.

**tipledown** - March 23, 2010, 2:52 pm

Works! Thanks for share :Smile:

**vrysleepy** - March 23, 2010, 3:51 pm

i tried, but when i open the site..

it just shows a list of all the files.

**SkeetMads** - March 23, 2010, 4:55 pm

I love it! Thanks, man. It's really useful :)

**taketheheat** - March 24, 2010, 3:36 am

is [http:// T 3 5 .COM](http://T35.COM) better than TK ????

and thanks for ur thread ! simple and smart ! easy to understand  
answer by pm i don't check back my posts :s

**protocol™** - March 24, 2010, 3:50 am

very nice tut mate

thanks for sharing

**GameOver\*** - March 24, 2010, 5:52 am

nice share dude thanks !

**encrypt** - March 24, 2010, 6:27 am

Great tutorial. Thanks for sharing!

**z†cq?** - March 24, 2010, 8:43 am

It's not working. When I open the page, the fake video is loading starts and then it redirects to index2.html where it shows some ads.

**Refresh!** - March 24, 2010, 11:21 am

the websiet for hosting doesn't work for me

**blackf1re** - March 24, 2010, 1:36 pm

Hey mate, the page tries to execute a EXE file on Linux.

That does only work if you execute it with Wine.

Thanks very much for the tutorial :)

**H3Gatm4h** - March 24, 2010, 2:19 pm

nice setup    great tut

**z†cq?** - March 24, 2010, 2:21 pm

Umm, can anybody try, if the Java window opens?

[http://zicka.t 35.com/](http://zicka.t35.com/)

WARNING! DO NOT CLICK RUN, IF IT DOES.

**CyberM@X** - March 24, 2010, 4:27 pm

Nice guide ! very usefull info :)

**xx3pleKiLLxx** - March 25, 2010, 12:59 am

Fileave wont let me upload a single file. Cannot find a part of a file blah blah

**Greg-** - March 25, 2010, 7:52 am

just a piece ok cake

thanks man for this

u all r really making things simpler :P

**kol360** - March 25, 2010, 4:15 pm

hey thanks i got it all working i just want to know where do i recive the infomation???

**p0wn3r** - March 25, 2010, 4:18 pm

Epic guide:)

5/5

Really nice... keep it up.

**Entity Escape** - March 25, 2010, 7:05 pm

(Mar 25, 2010 04:15 PM)kol360 Wrote: [\[CITE\]](#) hey thanks i got it all working i just want to know where do i recive the infomation???

if its a keylog, you get it in your email, if its a RAT, you should see your victims in the console.

**Fallensoul289** - March 26, 2010, 9:11 am

Thanks man I did this about a week ago and so many people downloaded the keylogger I had. Great tutorial. I would + rep you if I could.

**Perforate** - March 26, 2010, 9:59 am

Nice tut, works like a charm thanks

**Puyo** - March 26, 2010, 10:20 am

Thanks a ton it worked perfectly

**eneakume** - March 26, 2010, 7:48 pm

aaha i see myself on the side, this was my copy.

**TheBlackHat** - March 26, 2010, 8:37 pm

(Mar 26, 2010 07:48 PM)eneakume Wrote: [\[CITE\]](#) aaha i see myself on the side, this was my copy. Ugh what?

**Aw Ma Gawd** - March 26, 2010, 8:47 pm

didnt seem to work..i just lost all my bots...:S

**TheBlackHat** - March 26, 2010, 8:59 pm

(Mar 26, 2010 08:47 PM)Aw Ma Gawd Wrote: [\[CITE\]](#) didnt seem to work..i just lost all my bots...:S Heh,it works mate,as you have seen throughout the thread.Pay closer attention next time.

**??tacl??m** - March 27, 2010, 5:15 am

I cannot find an "Open with" option over any of the java files in Winrar in order to open with Notepad. Any thoughts on fixing this delay? (Have already made an "Open with" key in regedit without good

results.)

**Affliction** - March 27, 2010, 6:49 pm

thanks for the tut, this is amazing!

**hemescool** - March 27, 2010, 10:15 pm

account suspended

any other hosting?

**Gravy** - March 28, 2010, 12:02 am

i found this TuT really useful! nice share

**yakuzemer** - March 28, 2010, 12:46 pm

Question: It tells me that the DL cant be opened

C:\Windows\TEMP\Java.zip could not be saved, because you cannot change the contents of that folder.

Change the folder properties and try again, or try saving in a different location.  
Help?

EDIT-- Ok i guess im ratted because i turned mine off and i still cant get into it

**TheBlackHat** - April 8, 2010, 8:24 pm

Just Bumping this up for more to see :D

**manndi** - April 9, 2010, 12:04 am

filevae.com is banninng the accounts,do you any good hosting site

**oltenvisp** - April 9, 2010, 2:37 am

this is good but fileave is suspending accounts so you cant use fileave anymore

**TheBlackHat** - April 11, 2010, 3:25 pm

Bump this to the top :)

**ownage05** - April 14, 2010, 12:14 pm

it work but fileave always remove my account after i upload the files

**jesperbos** - April 15, 2010, 10:02 am

yeah fileave delete your account after uploading files are there other sites?

**TheBlackHat** - April 15, 2010, 11:07 am

You guys can use R I P W A Y.

**chrisftw** - April 15, 2010, 3:54 pm

can you autorun the server once they accept the java drive by?

**justblazeu** - April 15, 2010, 5:40 pm

(Apr 15, 2010 11:07 AM)TheBlackHat Wrote: [\[CITE\]](#) You guys can use R I P W A Y.

R I P W A Y is also suspending accounts D:

**Blue Username** - April 15, 2010, 9:54 pm

wont let give me verification email  
anyone have a account i could use

**Xaniar** - April 16, 2010, 1:54 am

R ipw ay and fileave both suspend accounts which use java drive by . :(

**internap dos** - April 16, 2010, 2:36 am

Dam keeps banning my account D: for bot Spam and fileav

**redletterhatter** - April 16, 2010, 6:27 am

Hmm ... the file hosting aside, is there ANY way to cause such an .exe to run without a pup-up window? OR, is there any way to edit what the pop-up window says?

**Indeed** - April 16, 2010, 7:02 am

Any other hosting services have a direct download link?

**oltenvisp** - April 16, 2010, 7:09 am

any other good site for java driveby then fileave cause its keeps suspending my accounts

**Rembrandt** - April 17, 2010, 2:21 am

Thanks for this dude!

**Indeed** - April 17, 2010, 3:16 am

Okay it runs fine but doesnt make my stealer work - would this work with iStealer?

**TheBlackHat** - April 17, 2010, 7:05 am

(Apr 17, 2010 03:16 AM)Chase Hawk™ Wrote: [\[CITE\]](#) Okay it runs fine but doesnt make my stealer work - would this work with iStealer?

It should yes.Guys I dont really know any other websites like r i p w a y and fileave.I'll google up a bit lol

**Indeed** - April 17, 2010, 7:16 am

Nah it doesnt, hmm not sure what I could be doing wrong.

**Mik?** - April 17, 2010, 12:08 pm

Thanks for this TUT. Helped me a lot. :)

**Rhizoid** - April 17, 2010, 12:28 pm

use megabyet(dot)com Its a free hosing site, and my friend says his driveby is still up and running on it.

**Repeat** - April 17, 2010, 6:22 pm

did it all then typed my link in the java thing popped up, i hit run, but the server didnt work...

**C10Wn** - April 17, 2010, 6:37 pm

Is there any other hosting places i can use i keep getting ban :'(

**4th Dimension** - April 18, 2010, 9:40 am

very good tutorial thank you :)

**Elevation** - April 18, 2010, 10:14 am

Thanks really quick and easy, great guide helped.

**upx3782** - April 18, 2010, 11:54 am

keep getting this error:

<http://img683.imageshack.us/img683/8738/errorec.png>

**Zeper** - April 18, 2010, 12:21 pm

how do I get rid of this? I click installed java when someone sent me a link. and I am getting controled.

**Zeper** - April 18, 2010, 5:53 pm

bump, how do I get rid of the java driveby? someone sent me it

**upx3782** - April 19, 2010, 7:20 am

I have an own domain with a host up 24/7, can i host the file there?

**Mixu** - April 26, 2010, 10:49 am

Wait wait,, Why do you need the # for? Why cant you just let them be in fileave?

**frostful** - April 26, 2010, 11:38 am

Nice tutorial.Very nice.

**Ramsay448** - April 26, 2010, 12:06 pm

I have a problem, as Fileave wont le me upload the virus:

Could not find a part of the path '\\192.168.0.16\users.fileave.com\XXXXXX\Server.exe'.

any ideas? ?

**Moneybags** - April 26, 2010, 1:31 pm

There are alot of these tutorials out there. But , this one looks good ;D

**placeholdera** - April 27, 2010, 3:33 pm

The VBS script gives me a Subscript out of range error.

**Traditor** - April 28, 2010, 10:19 am

Can't wait to try this!

Nice job!

**PunkkX** - April 28, 2010, 6:22 pm

[www.fileave.com](http://www.fileave.com) doesnt work anymore?

**darkheart2ki** - April 30, 2010, 4:17 pm

great fucking tut i would leave +rep if i could

**Blackice** - April 30, 2010, 7:15 pm

Well obviously if your virus isn't fud no crap.

tahayassen - May 11, 2010, 6:18 pm

Why do we need to register at T35?

Wiggs - May 11, 2010, 6:30 pm

(May 11, 2010 06:18 PM)tahayassen Wrote: [\[CITE\]](#) Why do we need to register at T35?

You can register anywhere, he just recommends T35.

fallax - May 13, 2010, 5:28 pm

(May 10, 2010 10:40 AM)TheBlackHat Wrote: [\[CITE\]](#) Well obviously if your virus isn't fud no crap.

No, no, server.exe is 100% FUD and Runtime, but AV, avast and many other seem detect them now...

Any solution ?? ?

the duchess - May 13, 2010, 5:54 pm

I'm an EXTREME noob at hacking but what is the point of spreading a virus? (sorry for being 100% noob)

itmoney22 - May 13, 2010, 11:27 pm

i must say it took be about 1hour to set up but now works perfectly.. What is the point of t35? since using fileave makes it a .com website.?? maybe be more clear on how to get to index2 where you type your virus link from avefile.com..... AN EASIER way is to just upload all 5 links from winrar (java) after uploaded go to view my files: and you'll see all 6 files you uploaded 5 from java you get from download on his page and 1 from ur bot or virus link ur spreading. once that step is done just go to "my files" and under (index2) click edit to get to the NOTEPAD PICTURE you see in tutorial.. and update ur link there :) only 2 two places. then

use the link u get from (index) as the link u send to ppl to get bots

overall good tut :)

**TheBlackHat** - May 14, 2010, 1:19 pm

(May 13, 2010 11:27 PM)itmoney22 Wrote: [\[CITE\]](#) i must say it took be about 1hour to set up but now works perfectly.. yeah well if ur such an expert why did u have to look at my tutorial?Nub

**fallax** - May 14, 2010, 1:29 pm

Do you have a solution ? index2.html is detected like trojan by people who conected

**Clothar** - May 18, 2010, 8:59 am

FIRST: Thanks for the tut, I like learning new things

[solved]

**TheBlackHat** - May 18, 2010, 11:21 am

(May 18, 2010 08:59 AM)1337ftw Wrote: [\[CITE\]](#) FIRST: Thanks for the tut, I like learning new things

I keep getting an error when i hit index2 on my page. I've done everything you said, except, i'm using a different web host (SPAM) and i uploaded the virus to mediafire. i went to the media fire page of my trojan and where it gives you the " click here to download" link i copy link location, so that when you paste it in ure browser, the site doesnt change, but you get u get the little box that pops up asking if you want to download the file of just open it. this is the link i pasted into index2:(<http://download559.mediafire.com/oz1midkctmqg/yyznnzwy1jd/crypted.exe>) is this where i went wrong?

You did it wrong.It only works for links that are direct upload like fileave or Spam.Spam hasn't suspended my yet for having my servers uploaded,try it.

**Clothar** - May 18, 2010, 11:52 am

Thanks. I figured that was my problem.

**tala43** - May 18, 2010, 12:14 pm

Works ! thanks

[img]http://img52.imageshack.us/img52/1145/hfghfgj.png[/img]

**Clothar** - May 18, 2010, 12:28 pm

dont use SPAM.com (it doesnt work with that site for some reason) i did EVERYTHING the same, but uploaded with t35 instead and it worked. :)

**dextor1372** - May 18, 2010, 2:37 pm

wow - simply WOW - nice nice nice share, guess i need to go crypt my stuff now lol

**1-800-you-fail** - May 23, 2010, 5:07 pm

so how i kno it work now? ^.^

**-WildFire-** - June 3, 2010, 10:16 am

AVG say that (index2.html) a virus is, is it safe???

**CacaoBux** - June 3, 2010, 10:56 am

is there a way when someone log into the website java driveby to dont show this warning and just get infected ?

**[MaRiJuAnA]** - June 3, 2010, 11:20 am

Thanks for posting this tutorial! I was looking everywhere for this

**CacaoBux** - June 3, 2010, 1:58 pm

is there a way when someone log into the website java driveby to dont show this warning and just get infected ?

**XXXandBEER** - June 3, 2010, 7:02 pm

Website says it takes 5 days for administrator approval?

**Blackice** - June 3, 2010, 7:08 pm

Use xtreamhost instead. There's a tut about setting everything up

<https://hackforums.net/showthread.php?tid=377827>

**theshake** - June 9, 2010, 7:16 pm

cant upload to site does it have to be FUD ? will it still execute if its a RAR? when i upload to fileshare

**theshake** - June 10, 2010, 5:01 pm

is there a way to redirect this to another site once the accept download to make it seem more legit?

**6010fd12** - June 11, 2010, 10:27 pm

um guys i heard this was patched. anyone want to confirm?

**PrecisionLex** - June 19, 2010, 1:34 pm

very nice tutorial good work!

**hahaha.lol** - June 19, 2010, 2:25 pm

I Did it and it worked..Thanks matey for helping other hf members

**Oreos** - June 22, 2010, 11:36 pm

really nice post, dude.

just a quick question though. how hard would it be to integrate a video into the java driveby.? a video like the one from youareanidiot.org

**SewDough** - June 23, 2010, 4:17 pm

Wow, Not bad, my friend, not bad.

**zIISkuNkIlz** - June 23, 2010, 8:22 pm

good tutorial!!! can i put this on facebook??

**6010fd12** - June 23, 2010, 8:45 pm

I heard Java patched this though?

**Lukec12** - June 23, 2010, 11:23 pm

Thank you. I'm new and this was easy to follow.

**hacc** - June 26, 2010, 2:20 pm

Works for me :D

Good tut

**Grift.** - June 26, 2010, 7:50 pm

(Jun 11, 2010 10:27 PM)6010fd12 Wrote: [\[CITE\]](#) um guys i heard this was patched. anyone want to confirm?

I think it's patched with the newest version of Java so if you have the old version like most people, it will still work (apparently)

I get an error when I try it on myself, maybe I have the updated version or something.

**Ironsides** - June 27, 2010, 10:30 am

Man, please add me on MSN: GregorSturm12@gmail.com

Your tutorial explains to low how to do each of the steps... I really need help, as when finished, I just got an error.

**Blackice** - June 27, 2010, 11:15 am

Fileave seems to be junk. Use <https://hackforums.net/showthread.php?tid=377827&page=1> instead.

**Ironsides** - June 27, 2010, 11:38 am

Just 1 question, I got some error message when I clicked Run, so is that a Real error or a fake?

**TheBlackHat** - June 27, 2010, 2:28 pm

(Jun 27, 2010 11:38 AM)Barathrum Wrote: [\[CITE\]](#) Just 1 question, I got some error message when I clicked Run, so is that a Real error or a fake?

Its a fake haha,u infected urself.

**kieron0569** - June 27, 2010, 9:12 pm

uhm.. svb error? how do i fix this ad my msn: kieronbegley@Hotmail.co.uk

**elzor** - June 27, 2010, 11:45 pm

Not bad mate.

Nice work,

Hopefully i'll have to rat set up tonight then set this up aswell :)

**Ironsides** - June 28, 2010, 12:47 am

(Jun 27, 2010 02:28 PM)TheBlackHat Wrote: [\[CITE\]](#) Its a fake haha,u infected urself.

I noticed later, your wrong, this is a real VBS error, because the files didn't activate on me, neither on my friend.

Which means this method doesn't work with newer Java.

**kieron0569** - June 28, 2010, 3:19 am

yeah it does not work ;( been patched.

**-mothered-** - June 28, 2010, 3:29 am

Great contribution mate. I will add this to my collection and utilize It to It's potential.

Well Illustrated and easy to follow.

Thanks.

**Ironsides** - June 28, 2010, 5:46 am

I have found out, that you need to do this on a computer with old Java, if you have newest Java this won't work, you'll get an error.

So what I did was setup the thing on my Virtual Machine which doesn't even have Java :)

**Rusted Platinum** - June 28, 2010, 5:56 am

Fileave bannes account who setup for drive by

Thanx mate anyways

Correct me if i am wrong

**M4gik** - June 28, 2010, 9:44 am

Thanks. Easy to follow and understand. Simple and to the point. Need more tutorials like this

**Bi0hazard** - July 2, 2010, 8:13 am

was working, but now it's stopped working lulz ^^

**B?ast** - July 2, 2010, 10:54 am

NICE ONE m8 really good for rat tools

**darkozzy123** - July 13, 2010, 11:05 am

dose not work clicked download from the pop up and nothing it just had a error Java Plug-in 1.6.0\_20

Using JRE version 1.6.0\_20-b02 Java HotSpot™ Client VM

User home directory = C:\Users\FEEFEE

**Anonymous.7654** - July 13, 2010, 11:23 am

Thanks for tutorial,you helped many peoples.

**easyp** - July 14, 2010, 1:40 pm

thanks tried it and works!

**TheBlackHat** - July 16, 2010, 8:03 pm

Bumping up for more peeps to see :D

**Spellcater3** - July 17, 2010, 1:13 pm

Uploaded all the files and edited, but I keep getting a "page not found"

Edit- nvm, new java complications

**orionstar** - July 18, 2010, 2:45 pm

Great tut works nicely. I hear a lot of people saying Java driveby doesn't work anymore because its been patched. That's logical but can you all explain exactly what you mean by doesn't work? Do you mean it doesn't work automatically anymore, but that it comes up with a confirmation box you need to click yes?

Or are you saying it simply doesn't work anymore at all, whatsoever?

I am using the latest version of Java (downloaded and installed as of 07/18/10) popped my site in firefox and clicked yes to the java confirmation and boom got myself infected, came right up in my RAT. I see a lot of people saying it doesnt work and the others say it does... well mine works with a confirmation box to click yes before it auto downloads and runs. Hope this is more technical and explanatory for someone who wants details.

**SpriteZ** - July 18, 2010, 6:28 pm

Isn't this patched, or ....

**?ystem** - July 18, 2010, 6:48 pm

Each time I try to download the .rar it fails to connect to the server, so then I must wait 15 minutes to download it again because, according to them, I am already downloading the file, which I haven't. Then this exact cycle begins again.

**Aerow** - August 9, 2010, 9:46 pm

Thanks mate, it works fine

~Aerow

**Plutonium** - August 11, 2010, 1:13 am

Hello! Thanks alot for making tutorials like theese. They are very well needed on HF. Keep on posting tutorials like this!

\*Bookmarked

~ P

**woodo** - August 11, 2010, 3:03 pm

I tried this script on Zymic host and the result: <http://woodo.zxq.net/index.html>

**ahsanciit** - August 11, 2010, 3:52 pm

Could not find a part of the path 'fileave.com\ahsanciit\Fg Virus.exe'. ?????

**lemondragon** - August 12, 2010, 11:29 am

At t35 . com : DO NOT attempt to use our services for phishing (stealing passwords), spam or anything illegal. You will be caught, blocked, and reported to the police ?, along with the other abusers on our Abuse List.

it... Kinda scares me...

**quintz** - August 12, 2010, 11:52 am

Index2.html is detected as a download agent by AVG o\_o

**woodo** - August 12, 2010, 3:10 pm

So you mean you improved the index2?  
The old one is detected and yours not?

**BguyTheKing** - August 14, 2010, 2:59 am

thank you very much. That works for me >.111

**kakadii** - August 31, 2010, 11:12 am

So once they get to that run screen, they have to click run or accept inorder for the server to be installed or ran on there comp?

**Xcstacy** - August 31, 2010, 11:15 am

Great post mate! Thank you for this.

**iamnotHacker** - August 31, 2010, 11:00 pm

nice work thank you man..

**Shavor** - September 10, 2010, 4:00 pm

good post, i set it up doesn't seem to work for me for some reason but it works for my friend, proly an issue with my server though, thanks

**mUtWo** - September 10, 2010, 6:28 pm

Thanks a lot for this mate!

**fl4m3** - September 14, 2010, 9:40 am

Thanks for the share, it's not working for me though :(

**NUMB2R44** - September 14, 2010, 4:16 pm

Vouch for this guy very good tut.

Great guy.

Thanks

**joenyftw** - September 14, 2010, 7:52 pm

(Mar 27, 2010 05:15 AM)InstaR3acT Wrote: [\[CITE\]](#) I cannot find an "Open with" option over any of the java files in Winrar in order to open with Notepad. Any thoughts on fixing this delay? (Have already made an "Open with" key in regedit without good results.)

Lol same happened to me, open up notepad first then browse to the file you want to open, make sure you have "Browse All Files" selected and not just ".txt" .

**noid** - September 17, 2010, 1:11 am

Thanks again dude!!I'll be working on this later...

**rd3ad** - September 17, 2010, 1:13 am

Very detailed and informative, I will definitely use this tutorial.  
Thanks!

**ub€rh4x0r** - September 17, 2010, 4:37 pm

Good tut!  
I can have use for this in the future  
thnx!

**noid** - September 17, 2010, 10:35 pm

That was a really shitty tutorial.

**Sgtbent** - September 18, 2010, 3:10 pm

Thanks for the great guide and the pics :)

**Star Pker** - September 19, 2010, 10:32 am

THANK so much! (:  
I cant wait to try this to all my friends!

**Genocidez** - September 19, 2010, 7:04 pm

Good tutorial, I just need to find a virus to upload :[

**Cam G** - September 19, 2010, 7:25 pm

I hope by find you mean choose a type of malware that you made yourself O\_o.

**MoonWalker** - September 19, 2010, 9:59 pm

nice tut mate.. really helpul.. thank you

**Confused 1** - September 21, 2010, 8:24 pm

Hey awesome tutorial! :) I got mine setup in only a few minutes. Thanks a lot!

-= Confused 1 =-

**xxcrypterxx** - September 29, 2010, 4:11 pm

thanks for the share im making it now :)

**elvinguitar** - September 30, 2010, 1:48 am

its detected by avast..

shorttt

**Pro Hacker007** - September 30, 2010, 4:53 am

Heey nice tut but do you have to have java installed on the computer before you do it coz when i set it up and went to the site it say download java the run box thing does not pop up please help :)

**Truth Hurts** - October 9, 2010, 11:54 pm

Isn't this java drive-by 'out of date' now?

lol

**Developer** - October 10, 2010, 12:03 am

(Oct 9, 2010 11:54 PM)Extraordinary Wrote: [\[CITE\]](#) Isn't this java drive-by 'out of date' now?

lol

No, the concept of the codes on HTML are the same.

**TheBlackHat** - October 10, 2010, 12:04 am

This isnt fud anymore so everyone knows,it was when this thread was release though :P

**Developer** - October 10, 2010, 12:13 am

(Oct 10, 2010 12:04 AM)TheBlackHat Wrote: [\[CITE\]](#) This isnt fud anymore so everyone knows,it was when this thread was release though :P

Yeah, it's outdated in the sense of being detected, but other than the coding is the same.

Btw, you forgot to [x] on your 100 reps.

**BzVzKz** - December 20, 2010, 7:20 am

Wicked tut mate very easy to follow! ROLL ON THE VICTIMS!!!

**DeMoNiC** - December 21, 2010, 4:49 am

Thank you for this :) very good tut and easy to understand. Been looking for something like this and am new to it. ?

**intheoZ** - December 26, 2010, 11:58 pm

Not fud then what other easier options are out there?

**Havv0c** - December 27, 2010, 10:50 am

This may just be a stupid question however Im curious: Is there anyway that when the victims select cancel it triggers your file to download onto their computer? like a trick.

**protek** - December 27, 2010, 10:58 am

Thanks dude..

MSG2SHORT

**Diamond Supply Company** - January 1, 2011, 10:01 am

Wow..I cant upload client.jar :S

**ebonie101** - January 10, 2011, 2:59 pm

ok and after we have this then what do we do with it?

**Beast Mode** - January 10, 2011, 4:52 pm

Looks pretty good, will probably use it in the near future.

**killer k156** - January 20, 2011, 7:50 pm

can some1 explain to me how a java driveby become un fud and how u remake it fud seams to me only the file being dl'd needs to be fud

**roshandeal** - January 20, 2011, 10:46 pm

i know it might be pretty noob question

what if its not fud

would it be got detected even server fud?

how??  
can anyone explain

**R.A.Y** - January 21, 2011, 4:29 am  
preety Good job mate..nice work.

**best4ushah** - January 21, 2011, 12:32 pm  
guys why client.jar can't upload on that site please help here

**gfn00blet** - January 21, 2011, 2:40 pm  
pretty good tutorial...thanks

**c0mboz** - January 24, 2011, 4:17 pm  
Thank you very much, first java driveby guide i could actually manage lol XD

**oxmose** - January 25, 2011, 11:53 am  
THANKS A LOT BOY !! iStealer don't work with java ? Because my virus don't work :/

**Riddle** - January 25, 2011, 12:01 pm  
Decent tutorial, straight to the point.

**Verbal Seduction** - January 31, 2011, 9:36 pm  
not working anymore =(  
``too short``

**GipsyRyan** - February 8, 2011, 1:33 am  
Thanks for posting this, but I just got one question.  
I got fooled with something like this yesterday, BUT  
If I make something similair to this, and someone clicks 'Run'  
then how do I make the logs go to my email?  
Well, I got another question.  
I downloaded the java file.  
But where do I find the .exe file (Step 3)  
Because it's not on 'My files' page on the fileAve.com site

**Xp3** - February 8, 2011, 1:55 am  
Beast guide.  
Gotten 10+ vics on chatrooms :D:D:D:D:SSD:SD:

**autorunman22** - February 10, 2011, 6:25 am  
i have a question op, when the target clicks cancel/no, does it takes still the execution of the virus?

**wertyl11** - February 10, 2011, 6:26 am  
A good tutorial for beginners.

Nice job

**Chris..** - February 10, 2011, 6:47 am  
Nice tutorial man will help alot of users out in there quest.

Good Job.

I personally dont use java drive bys tho.

**harris21** - February 10, 2011, 7:18 am

Nice tutorial mate...keep it up :)))

**Lipscomb** - February 10, 2011, 9:29 am

# web hosting, for whatever reason, will not allow me to upload your .jar file. Could this be a result of it not being FUD or is there some other reason at play here. Other than that, this was a great tutorial for a beginner like me just trying to learn basic skills. I really appreciate your effort!

**SIM-135152** - February 10, 2011, 10:05 am

thanks man great tut

but i have a question does it works on firefox

**bigclip** - February 10, 2011, 10:17 am

Nice tutorial bro. I'm gonna try it out ASAP.

-bigclip

[HUSTLERS]

**TheBlackHat** - February 11, 2011, 10:05 pm

Might as well get some more people to see this

**Xp3** - February 11, 2011, 10:14 pm

Awesome tut, helped me make my driveby :D

Thanks

**Strykelt** - February 15, 2011, 8:27 pm

Awesome tut, odd thing though: when I uploaded it was a jar file not exe. What am I doing wrong?  
:S

**Davy** - February 19, 2011, 6:34 am

Where will the logs come?

**Stockholm** - February 20, 2011, 4:45 am

whos acc is this <http://DeVirus.fileave.com> xD on fileave. lol nice deface:)

**ravens** - February 20, 2011, 5:47 am

can u release the client.jar decompiled so i can see how u do it maybe try to edit it a little to make it more undetectable? thanks man

**pr3torian** - February 20, 2011, 4:54 pm

Nice tut...

But, what u also can do, is crypt the html file after uploading..

u can crypt ur html file here:

[http://www.iwebtool.com/html\\_encrypter](http://www.iwebtool.com/html_encrypter)

that will keep ur server or whatever FUD

good hunting

**nouman80** - February 21, 2011, 4:54 pm

Wow man thanks for this great guide bro.

**ChubbyBalboa** - February 21, 2011, 9:07 pm

Thanks a lot for this! Will come in handy :D

**rezonen** - February 21, 2011, 11:44 pm

HELP! It wrks sometimes and sometimes not. Sometimes the "java popup" thingy doesnt popup =/

**HakkuR** - February 22, 2011, 3:39 am

There lots of new java drive bys out there is this one of the FUDDED ones?

**ritonda66** - February 22, 2011, 7:57 am

i cant open it.

my anti virus shows me as a virus

**HakkuR** - February 22, 2011, 8:03 am

(Feb 22, 2011 08:57 AM)ritonda66 Wrote: [\[CITE\]](#) i cant open it.

my anti virus shows me as a virus

You are going to have to knock your antivirus out disable it.

**Slag** - February 22, 2011, 8:49 am

I like the idea of this, I know you did state that it's not fud

Quote: "ATTENTION THIS IS NOT FUD ANYMORE,IT USED TO BE LOL,SO PLEASE DONT POST ITS NOT FUD WE KNOW :D"

Do you know any FUD? I've seen a couple selling in the Market place, but I'd like to search around and look for a free Java driveby, that is FUD.

**sivan211** - February 22, 2011, 10:57 am

Client.java dont work help please?

**thejavafreak** - February 22, 2011, 11:45 am

i'm done with everything except I can't upload the Client.jar file ? Any Idea why?

**nouman80** - February 23, 2011, 5:57 pm

You guys are such leachers , I honestly hope you dont even find a FUD Java Driveby. You have 5 post count and your talking about getting a free one , contribute to the site so you actually deserve it.

Honestly i believe you should have 500+ Post count to download anything from this website. I dont even meet that, and it would stop leachers from making everything so detectable/ whining all the time.

**Matty** - February 24, 2011, 8:41 am

Quick Question

T35 ToS :: Do NOT attempt to use our services for phishing (stealing passwords), spam or anything illegal. You will be caught, blocked, and reported to the police, along with the other abusers on our Abuse List. There is no such thing as "phishing for educational purposes", all phishing is ILLEGAL and will be reported.

^

Should I be worried about that?

**hellmiracle** - February 26, 2011, 3:51 am

Wont let me upload the Client.jar file, how do i do so? :S

**Cavalieros** - February 28, 2011, 4:37 pm

Can I use this type of attack to modify existing firefox extension, so the victim's browser show webpages incorrectly?

**tasticz** - March 5, 2011, 7:31 am

this worked woot thanks man really appreciated!

**Stenography** - March 5, 2011, 1:07 pm

awhh dude .. If i was a l33t .. I was giving u for that 534251555 rep .. Thank u sooo much .

**zomg waffles** - March 5, 2011, 11:43 pm

is this easier to make than a RAT ?

**F00F** - March 8, 2011, 6:10 pm

nice job dude Thanks you really help me  
really good tutorial

**saintcj** - March 8, 2011, 11:15 pm

Checking files:

File Client.jar is OK

Transferring files to the FTP server:

File Client.jar could not be transferred to the FTP server

How to fix that error? Would somebody help?

**willbebacksoon** - March 8, 2011, 11:27 pm

Check my Sig link for an FUD java Drive by with Cool GUI :->

**trueelite** - March 10, 2011, 6:18 pm

Client.jar won't upload to the ftp server..  
really helpful tutorial though thanks!

**Zhen.** - March 12, 2011, 9:45 am

Thank you so much for helping us out.  
I am kinda newbie at Java Drive stuff, so this will pretty come in handy.  
Keep up the good work bro xD  
Peace ?

**[b]/[b]** - March 12, 2011, 9:49 am

Does FUD mean fully undetected?

**Ghost Protocol** - March 12, 2011, 9:49 am

awesome tutorial bro thanks for the info

**Diagnoses.** - March 12, 2011, 10:16 am

(Mar 12, 2011 10:49 AM)Adjunction Wrote: [\[CITE\]](#) Does FUD mean fully undetected?

Yes fud mean fully undetectable

**[b]/[b]** - March 12, 2011, 10:34 am

(Mar 12, 2011 11:16 AM)Anarchy™ Wrote: [\[CITE\]](#) Yes fud mean fully undetectable  
Thanks for answering my question.

**Zhen.** - March 12, 2011, 11:23 am

FUD= Fully Undetectable

UD = Undetectable

Peace ?

**Tellmelies** - March 12, 2011, 2:00 pm

The client doesn't upload, is their anyway to fix that?

**k8z** - March 12, 2011, 4:46 pm

This isn't FUD anymore, click my sig for a FUD Drive-by =)

**Red Duce** - March 14, 2011, 9:16 am

ROFL

there is a fucking virus in this

**do\_rrr\_die** - March 14, 2011, 9:19 am

Thanks for the helpful tut:)

**Mr.thinker** - March 21, 2011, 1:09 am

Thx A Lot It Help,s Me :)

**killers10333** - March 24, 2011, 7:26 pm

lol my antivirus detected a virus..i wonder why =\

ps- im being sarcastic

ok actually i cant find server.exe anywhere... did i download the right file?

edit- figured it out lol

**hobby203** - May 5, 2011, 9:05 am

Sorry if i sound like a complete newb but i am one, when i try and upload the Client file to the t35 site it says it can't transfer it to the FTP servers, what can i do so it will?

**D3N** - May 5, 2011, 11:00 am

LOL people still use this java applet written by me. That's funny. You don't need to have an exe file on the linux line, that doesn't even make sense. Just remove it altogether.

**kimx3710** - May 10, 2011, 3:42 am

Nice but i have a problem. When i upload my .exe file the website delete it, is it because its not crypted ? And what link should i send to people my index 2 or the direct link to the .exe ?

**Di?** - May 10, 2011, 5:17 am

Thanks for the share (:

Pretty Cool

**Gizmo** - May 10, 2011, 3:19 pm

Is this one FUD if we crypt our server?

**Jeteater13** - May 17, 2011, 1:33 pm

I realize i sound pretty stupid saying this, but...

when i try to upload client.jar, it says it can't be transferred. any ideas why? pm me plz.

**RussianFederation** - May 17, 2011, 1:51 pm

Good tutorial, well written..

**Aaron1Olson** - May 18, 2011, 11:03 pm

this is a super mega HQ thread

thank you dude

**Dutch Wildy** - May 19, 2011, 8:59 am

awesome bro if i could rep i would :D

**be owned1** - May 30, 2011, 11:01 pm

Very nice guide. Thanks for the help ^^

**Santal** - May 31, 2011, 10:56 pm

Guys you have to crypt the jar and you cant use T35, they banned Java files lol, try 20megsfree.com. It has a long sign-up process but it takes any file. :)

**Beastwood** - June 3, 2011, 5:23 am

thanks, this was really helpful! i've tried a different one before and it didn't work, so i'll keep this guide bookmarked for any help :D thanks again!

if anyone needs a new hosting site, try 110mb.com (:

**?Ñåg?! - June 5, 2011, 1:33 pm**

File Client.jar could not be transferred to the FTP server..fuck

**PedroDJ** - June 6, 2011, 9:41 am

Attention: in the index2.html files there's this call to

eneakume.fileave.com/Server.exe

and the .jar is detected as JavaScript Obfuscation: useless for me :)

**OLOY** - June 11, 2011, 4:12 am

this really helped me get alot of vics! thanks ;D

**HSx4** - June 24, 2011, 3:29 pm

<http://snpr.cm/zbhVLh.png> help?

**umar.2006** - June 24, 2011, 4:05 pm

Nice TUT, will try this now :)

**christaphaa** - June 24, 2011, 11:47 pm

thanks man this helped alot.

**nitink** - June 25, 2011, 12:24 am

i cant find sever.exe  
i need virus can any one help me out

**Bobby Trill** - June 28, 2011, 4:20 am  
Thanks you very much :D !!

**Great Prosperity** - June 28, 2011, 1:06 pm  
Well this tutorial is for beginners, but nice job with it nevertheless.

**Dreams** - July 5, 2011, 6:03 pm  
WTF! when i upload something its says i dont have permission! WTF

**Beastwood** - July 6, 2011, 5:29 am  
(May 10, 2011 03:19 PM)Gizmo Wrote: [\[CITE\]](#) Is this one FUD if we crypt our server?  
No, since the .jar file is the one which the AV detects.  
(Jul 5, 2011 06:03 PM)DJ Khaled??????????????? Wrote: [\[CITE\]](#) WTF! when i upload something  
its says i dont have permission! WTF  
this may be because some hosting sites don't let you upload known infected files /:

**Leave.Exe** - July 6, 2011, 6:40 am  
Good Tuto Is Works Thanks ;)

**Ego Inc** - September 24, 2011, 9:27 am  
wow this help alot! deffinatly gana use this!

**KiiNGSKiILLz** - September 24, 2011, 9:47 am  
could you please put the index2.html code here,mine won't extract please!

**RsShadowX** - September 25, 2011, 2:32 pm  
Works! You're a God! <--- I wouldn't go to that extent

**Ghostly Error** - October 5, 2011, 7:54 pm  
t35 doesnt let you do it anymore please cani have another webhosting site?

**balakubak** - October 5, 2011, 8:00 pm  
i like this tutorial..tutorial make spread fast...thkz bro

**pat4986** - October 7, 2011, 2:30 pm  
i still got one of my friends with this even though its not fud. still awesome.

**The Unknown** - October 7, 2011, 2:55 pm  
Thanks man, the only JavaDrieveby That was working for me was yours IOL

**greenmaster** - October 14, 2011, 11:48 am  
And how long i must wait for victim connect to my server?

**blackmamba81** - October 14, 2011, 6:27 pm  
Is there any way to reFUD with a crypter, just like a server?

**Master Yoda** - October 14, 2011, 8:59 pm  
Is there a good alternative to fileave?

**greenmaster** - October 15, 2011, 11:27 am

doesent work for me.. i only get 3 files.. not 5..

**\_raX0r\_** - October 16, 2011, 3:12 am

A helpful one..Thanx for the share.

**Tribbi** - November 21, 2011, 3:15 pm

Aww, it's now an outdated java.. Please guys help me i can't find a new better updated one? "/

**403** - November 21, 2011, 3:20 pm

looks nice going to try this out tomorrow, even though its not fud. :D

**0x0D** - November 26, 2011, 8:24 am

im still trying to find a guide on what a java driveby does and how to use it accordingly anyone know of a guide like this on HF?

**Billy Hope** - November 26, 2011, 8:28 am

Nice tutorial keep it up :D  
toshort ;lll

**Unker** - November 26, 2011, 8:34 am

Nice tutorial, thanks guys !  
Message Too Short

**slacker187** - December 6, 2011, 12:28 pm

Thanks for the TUT; but this method no longer works for me. It will ask to run the update, execute, but no infection. (Yes the server link is still live)???

**Koots** - December 14, 2011, 7:10 am

can you use another host than fileave.com because for somereason i cant connect to that website always times out?

**The Deftone** - December 16, 2011, 3:54 pm

Guys you can use dropbox instead of fileave to get a url for your server. However i cant get this drive by to work. I go to my webpage and get an error report like so..

Java Plug-in 1.6.0\_29

Using JRE version 1.6.0\_29-b11 Java HotSpot™ Client VM

User home directory = C:\Documents and Settings\Daniel

Can anyone help me?

**ilialaliashvili** - December 20, 2011, 11:34 pm

do anyone have fud java drive ? or it will be fud when ill crypt ?

**sulysaly** - December 20, 2011, 11:37 pm

Thanks Mate! Looks really good. awesome Share.

--

**Kemikaali-Keijo** - December 30, 2011, 1:47 pm

where to upload? Fileave is not working

**Re?olution** - December 30, 2011, 5:34 pm

Lol just like Deftone said, you can use any hosting site for this as long as they allow you to get a direct download link. tons of guides on direct download links for file hosting sites.

**Crosshair5599** - January 27, 2012, 2:56 pm

THANK YOU SOO MUCH, Time to infect some old ass pervs, LOL  
?

**jfishy** - January 27, 2012, 3:34 pm

Great beginner tutorial! Is this still working?

**KirstyWH** - January 27, 2012, 3:59 pm

this was really useful so thanks from a complete noob!

**coldfire85** - January 30, 2012, 11:20 pm

looks nice gonna try it now, hope i succeed  
is there any FUD java driveby??one here in HF got detected

**haxxorboiz** - February 1, 2012, 12:23 pm

(Jan 31, 2012 12:20 AM)coldfire85 Wrote: [\[CITE\]](#) looks nice gonna try it now, hope i succeed  
is there any FUD java driveby??one here in HF got detectedLook in the premium sellers section,  
there are lots of FUD ones there.

**jp0wnedyou** - February 1, 2012, 12:53 pm

for some reason my thing can't find fileave.

**Jim Crow** - February 1, 2012, 1:54 pm

very nice tutorial mister keep on the nice work ;PPP

**Neal Caffrey** - February 1, 2012, 7:49 pm

Is there a substitute for FileAve?

I've tried it, and it doesn't work.

**Dubai** - January 28, 2013, 5:31 am

Sweet tutorial, how can i get it Fud now though?

**powerbk2** - January 28, 2013, 6:36 am

(Jan 28, 2013 06:31 AM)Red Phat Wrote: [\[CITE\]](#) Sweet tutorial, how can i get it Fud now though? faceplants the fuckin desk as hard as he can Did you view the date of the thread?

**JJ1039** - January 28, 2013, 7:55 am

(Jan 28, 2013 06:31 AM)Red Phat Wrote: [\[CITE\]](#) Sweet tutorial, how can i get it Fud now though?I've been wondering the same thing, it seems to me the only way to get it FUD is to buy FoxyJava or a similar service. At first i thought you could just recrypt the client.jar file as you would with your rat but that doesn't seem to work. If you ever figure out how to do it please let me know as well.

**Fanatik** - December 22, 2013, 4:41 pm

Very nice tutorial bro, thank you!!!

**Buddhax** - December 23, 2013, 1:04 am

there is some way to make the .jar file to be exectable? no the exe..?  
thanks!

**keylogg** - December 23, 2013, 9:47 am

is it hard to make silent java driveby need help on that

**HarveySpecter** - December 23, 2013, 12:16 pm

Wow this is amazing gonna give this a try.

**Kelemania** - February 11, 2014, 1:39 pm

This is neat, thank you very much! c:

**MrStubbs** - February 28, 2015, 6:38 am

The video is really nice and easy to understand :)

**Nalgun** - March 2, 2015, 9:04 am

Thanks, it works great job... nice tutorial

**finalpinka** - June 9, 2015, 11:30 am

Thanks again dude!I'll be working on this later...

**eklat92i** - June 10, 2015, 8:05 am

Thanks for the tutorial OP , working great !

**litek555** - June 11, 2015, 1:24 pm

Wow this is good mate im going to give it a try. Good Work

**easyway** - June 12, 2015, 6:55 pm

thank you for providing the link

**Zask3333** - April 28, 2016, 9:25 pm

download link is not working :(

**pbhuvanesh** - May 4, 2016, 4:17 pm

Thank you but pictures are missing/broken please fix them for better clarity :)
