Hope it works!

Tulious - February 20, 2013, 12:29 am

Thanks for the upload and direct DL!

Envyous - February 20, 2013, 12:43 am

Just downloaded. Better work here in aussie! SMS bombing away!

michael1947 - February 20, 2013, 6:47 pm

hi does not work in germany or the uk mainly i suspect as even without putting a country code in you only have 10 digits to work with 90% of germany and uk plus the usa

have 11 to 13 digits for the mobiles plus for me to dial my son in the uk from germany i HAVE to dial 0044 then the number which on his which is vodafone is 12 digits plus

4 for the country code that is 16..your tab for inserting the mobile number on the bomber only goes to 11 digits, so any idea what to do now???? would appreciate an answer

as most of the crap that is put on here and then does not work you write to the person concerned and never get a reply back..

thanks michael

sex n tits - February 20, 2013, 6:59 pm

can u please tell me if this works on macbook pro.

Insane Aim - February 20, 2013, 11:46 pm

killertudse - February 24, 2013, 8:55 am

How does it work? I tried to enter my own phone number and my country code but.. nothing ;C

i live in Denmark.

michael1947 - February 24, 2013, 9:24 am

with all due respect are you going to give an answer or explanation why and what which i wrote here 4 days ago, ref not enough room on your tab to insert german-spanish uk usa mobile numbers also a lot of members are talking about can i change the message reffering i assume to the sms bomber which is nothing like i downloaded, all i have is a a space to insert a mobile number and then?? tell me what does the reciever actually recieve, as i have no where to write an sms text so what is this I hope to recieve a reply withing 24 hrs or i will complain to the Administrator i thought we were all friends on here ??? michael

PinkPolarBear78 - February 24, 2013, 9:39 am

This doesn't work for me. It does not send a message at all. Anyone know how to fix it???

killertudse - February 24, 2013, 11:53 am

It works fine for me now!

The user gets a random message. Looks like an advertisement for something.

Paradise 07 - February 24, 2013, 12:24 pm

hope it works im going to download and test it

killertudse - February 24, 2013, 12:26 pm

Works great.

Just remember the full country code.

As for Denmark it would be 0045

I have trolled a few friends already :D

AangJia - February 24, 2013, 6:08 pm

Error Debugging..... It wont connect

I ran Fix Error Run me and still same problem

GreenShirtedGuy - August 31, 2014, 10:50 pm

I ran the Fix Error Run then the program itself, but when I try to connect it says "Error D-Bugging" please help. Thank you

It's probably because it is corrupted and you also have visual basic's or another GUI builder that it is

getting mixed up with. Hope you could understand but I'm really tired sorry

So confirmed for working?

Seems like everyone (including me) recently has been getting the 'Error D-Bugging' Error
