Thread: [\[TUT\] Different Wallpapers; Dual Monitors \[XP+ FREE\]](#)

trc_ - March 17, 2010, 8:44 pm

Lately, I've been tired of having two monitors of separate sizes and the wallpaper being sized differently and looking stupid.

Today, I am going to show you how to have separate wallpapers of custom settings (centered, stretched, etc...) by just installing free 3rd party software. It's a great tool for customizing your computer to higher limits.

1. Find two wallpapers of your choice. I have picked space wallpapers, because they look awesome :D
2. Navigate and download Display Fusion which can be found [HERE](#).
3. Run through the install process as you normally would with any other software installation.
4. Once installed: Navigate to the bottem of your screen via TaskBar.

Right-Click on the Display Fusion icon.

Click "Desktop Wallpaper"

Choose which monitor you want to set a wallpaper first by choosing one of the squares.

Once selected, Find the button called "Load From..." Click it and hit "My Computer" or flickr if you have a wallpaper on there you like.

Navigate to the picture and select it.

For the rest of the monitors, it's the same process above.

When finished, click "Apply" and then "OK"

Vouch for TrC! Nice tutorial btw. Love this!

-mothered- - March 20, 2010, 1:57 am

Very nice tut Indeed mate. This will definitely come to good use for a particular friend of mine. Much appreciate the share :)

Junction - March 20, 2010, 7:21 am

Nice tutorial bro...I like it :)

Psychotic Overlord - March 20, 2010, 7:42 am

awesome stuff man thats very nice

iRtehLeet™ - March 20, 2010, 9:13 pm

You can also have another program have the taskbar along both of the monitors its pretty cool.

Eweshi - March 20, 2010, 10:48 pm

thanks for the tut :D

Rs6 - April 4, 2010, 2:40 am

Nice tutorial. Thanks ?

The Hood - April 4, 2010, 7:41 am

Thanks for the tutorial, works for Windows 7 64bit.

CloudyBells - April 5, 2010, 1:53 am

Nice tut, thanks. Works great. Anyone know of a way to get slideshow wallpaper on dual monitors? I tried ultramon and that does the same as Display Fusion, but cannot do the slideshow on either monitor.

Embrace The Martian - June 3, 2010, 12:41 pm

Great tutorial TrC! I hope to see more tutorials like this in the future :D

MouseDesign - June 3, 2010, 12:57 pm

Finally. (: I'm so thankfull now, you wont believe it! +1. (:

(Apr 4, 2010 07:41 AM)fayt Wrote: [\[CITE\]](#) Thanks for the tutorial, works for Windows 7 64bit. Well, now that you've confirmed Windows x64 compatibility, I may just use this for myself. Thanks for the feedback/confirmation.

Despairfulness - October 14, 2011, 3:19 pm

Nice tutorial btw. Love this!Nice tutorial btw. Love this!

Clones - October 14, 2011, 10:37 pm

This is very helpful to me, thanks for sharing :)

BlackWings - March 22, 2012, 4:29 am

nice tut mate...a new thing to learn...
THANKS?

mohfed011 - March 24, 2012, 6:31 am

Nice tutorial. I'm gonna take a look at it. Hope it works well for me.
