Anyone.,please tell me,I am trying to switch btw Countries by using both on the same pc. For instance, in the SPOTFLUX window settings, i tried to fill-up Manual config for proxy and was asked to provide port..which port do i enter if i was switching btw UK n US,,thanks!!

Goodies - April 12, 2013, 4:38 pm

@cybernetiks

You can simply use a windows executable VPN with a US server. Or you can use an American proxy in your web browsers. Look up securitykiss.com. I supports PPTP and the executable.

cybernetiks - April 12, 2013, 10:21 pm

If you check out the links he posted at least 3 of the websites say in bright red text that they do keep logs and they even "scan" for illegal activity regularly. Just scroll down a tad and you'll see it.

Yeah anyway regardless of that this is indeed a great thread. I wish finding resources on HF was always as simplistic. Thanks a lot OP.
