Thread: [Free Shells \[L33T / UB3R\] \[GONE!\]](#)

B00B5 - January 24, 2013, 6:42 pm

Hello everyone.

I decided to open this small service for the community. Currently I have [0 free shells] that I'm willing to give away. If all goes successfully, I'll keep this thread running and invest more shells.

The shells I currently have uploaded are just the typical WSO shell. Here are the instructions on how you could go about getting these shells:

1. PM me.
2. If shell is legitimate, please post with a thank you.

P.S

If you're wondering why this service is only for l33t and ub3r members, it's because of the leechers and moronic losers that roam this section. If you're ub3r or l33t, you have a better chance of not being a complete fucktard. I may possibly make exceptions to certain members who have no membersips.

Thank you.

I need to test a few scripts if you don't mind. EDIT: Thanks for the shell!

BOOB, are you doing this on zentrix? Any of them running an early linux?

B00B5 - January 24, 2013, 6:49 pm

No, I'm not doing it on Zentrix right now. But I will shortly release some new WordPress and Joomla 0days on Zentrix, so stay tuned :P.

For most members here, yes they are hard to get.

Pathetic.

I explained quite clearly at the footer of the thread why I'm doing this service.
