How to use?:Spoiler [\(Click to View\)](#)

Set the messages to 25. This ensures stability. Fill out all the information correctly, no - between numbers and make sure it is a @gmail.com email. Put in the correct number (so make it 1234567890 not 123-456-7891) and hit bomb. Wait a few seconds and hit bomb again and again and again...you get the idea
