I recommend you put virus scans up, for you have 14 posts, and 0 rep -- An untrusted user.

I'm not saying you're a bad person, just that this is a little shady.

I recommend until you have proof that this pack is free of viruses, that you take caution. ?

Seems fishy, this download is a .EXE but has the name like this 'vbsources2012.rar.exe' maybe its just the downloader from Putlocker but why not try another uploading site?
