?aven's All In One Newbie Guide!

Welcome new comers, and veterans. This is my all in one newbie guide. This guide will have a collection of tutorial and tips from me and other various members here at Hack Forums.

What is the Hacking section?

Well the hacking section is for people to get tips on hacking, or too teach others about hacking. Remember though, read the [Help Docs](#) to know what black hat activity is NOT allowed.

Why is this posted in 'Beginner Hacking'?

The main reason I'm posting this here is because this section get's a lot of new comers here asking for hacks, or how to hack, etc. And I think if they see this, this can help reduce the number of repetitive posts.

Hacking Tutorials

Here are a collection of hacking tutorial from member around HF!

A good Start

[Pops COMPLETE Hacking Guide!](#)

[Eminent's MEGA THREAD! How Too be a Hacker!](#)

RATing & Spreading!

[Plutonium's AWESOME Dark Coment Setup Guide!](#)

[flAmingw0rm's Spreading Guide!](#)

[Vlad1k's Spy-Net Guide!](#)

Site Stuff, XSS, Deface, etc.

[Zer0Pwn's SQLi Tutorial!](#)

[tartou2's Website Hacking Thread!](#)

[bckslsh SQLi Tutorial](#)

[Zer0pwn's XSS Guide!](#)

DDoS & IP stuff

[coolmagicdude2's DDoS Attack Tutorial](#)

[Skittles-' How To Hack With an IP!](#)

FAQ

Should I RAT my school?

No, I highly suggest not doing this, this can lead to serious problem, not to mention illegal.

CAn Yous plz teach me too be l33t hax0r?

Sure, but first use the search function located at the top of your screen to find what you're looking for.

BuT i dont kno wher to start?

I would suggest learning a coding language first, then proceed to something simple like RAtIng.

That's it for now, if you think I should add any more, tell me! Thanks for reading!

Thank you mate! Hopefully this thread can reduce the number of newer people that ask these question, or can't find these tutorials.

This looks great, the only problem with guides in this section is they only last a half hour then they go off the first page.

True, that's why I'm going to try to keep this updated, and on the first page as long as possible.

I'm a newbie, probably one you've seen ask a repetitive question, and I'd like to take the time to thank you for your post, ?aven. I have soaked up HTML today (how to create the site, bg color, font color etc. Just got onto tables and then that's the end on codecademy.com. Would you recommend moving on to another language? I'll be checking out the links you provided in the meantime.

out the links you provided in the meantime.

Well depends, do you want to pursue another language? If so sure go for it! But it takes awhile to master one language in and of it's self. So I would continue learning HTML. But do what ever you feel you want too do.

**3lysium** - January 26, 2013, 4:52 pm

Where could I further my knowledge with regards to HTML then? Codecademy goes onto CSS after the current <table> lesson. I wish to walk amongst a collective i.e Anon. Any ideas what would be needed?

**amus3d** - January 26, 2013, 4:53 pm

Nice guide, should help new members assuming this guide will stay on the first page. :3

Try looking other place for a tutorial such as here in the coding section, or Google, or even Youtube.

Don't know too much about HTML, but I would try finishing that course, then expanding your knowledge else where.
