Thread: [TeV DoS Tool | Easy DoS \[Free & Direct download link\]](#)

© ÉliXéd_ - January 30, 2013, 4:27 pm

Old thread: <https://hackforums.net/showthread.php?tid=1091591>

Direct download: <https://www.dropbox.com/s/v7vb8ikl47kd8wl/TeV%20DoS.rar>

Made some money of it by selling and ads. Now here it is, free and direct download link. Virus scanner may say that it's a virus because the bat is made in exe. If you don't trust it, then don't download it, simple.

New_Stylez - January 30, 2013, 4:31 pm

Vouch for this thanks for the download and no shitcash

Joseph Lane - January 30, 2013, 4:46 pm

(Feb 26, 2011 10:09 AM)© **ÉliXéd_** Wrote: [\[CITE\]](#) Maybe your scanner see a virus in it! Here is the explanation once again:

This DoS is made in Java, the java app runs with Batch. But I've made the batch into exe. Because of this some scanners see this as binded.

Run sandboxed and see yourself.. It's no virus.

#JDM - March 11, 2013, 12:22 am

This can never be patched. It uses your own connection... Your connection is just weak.

Hey, I can't get the program to work. The TevDos.class and TevAttack.class keep dissappearing when I extract them. I think it's my virusscanner, but when I turn it off, they keep dissappearing.
