Nothing is too complicated, if you put effort into it.

doenertier - July 23, 2013, 5:09 am

Hey its not working for qpa2 protection :(

Hey, he did not use any specific clients MAC address, he simply told the WEP's access point that he is 00:11:22:33:44:55 just to hide his true MAC. Its a security measure so if (he)the access point's owners were to see a computer connected to (his)their network (he)they would see his spoofed MAC i.e. (00:11:22:33:44:55) ?

anoutlaw - December 17, 2013, 10:24 pm

thanks for the link share, definitely not that complicated :)

r00tuuu123 - December 17, 2013, 11:30 pm

The tuts on the aircrack site are all pretty thorough and if you can't find it here or on their site the aircrack forum has some really good ones. ?

Galileo Galilei - March 14, 2014, 7:34 am

hey could i have this please? also if there instructions because it looks a bit non-user friendly

please i need this ebook thank you in advance

Mad76e - May 17, 2014, 11:33 am

Well as usual its perfect, but it would be a good idea to explain to our newcomers what exactly you do, as i did in a similar tread..[here](#) else i have a feeling that they will just type in what ever you show them and miss the entire point with ChopChop

Just a suggestion tho.. Keep up the good work
