Just signed up for it, thanks for this i will try in a bit :]

just tried this on my connection didn't even lag it :(

Daddy???????????? - January 31, 2013, 6:50 pm

Why do we have to use port 53 for all attacks? Also Skype Resolver isn't working :(....

supa hot fire - January 31, 2013, 7:41 pm

This is a nice service! Although I'm not sure how to work it.

53 port right?

And for a homeconnection, should i use UDP?

First of all Those are not all me i have multiple people on my IP.
Using it

And i created a 2nd account cause i thought it was a glitch.

And i was hitting 1 ip because they kept ddosing me so i ddosed them offline to teach them a leason but i had to do it alot in a row.

And no im banned for no reason at all. When my friends are still on accounts booting the same ip 100 times in a row

And there was not rule saying Do not ddos the same ip constantly So yeah this is shit

signing up as alltimeslaya thanks bro

TwoFeesh - February 6, 2013, 4:35 pm

Do not sign up for this. If you accidentally send out 2 to the same person, he dossees you for a week. I didn't think a couple = multiple. This is a complete scam, you're better off buying another one/making your own with a source and webhost.

Take your sorry ass and get the fuck off this thread. You are so pissed because you got some red apples, and I banned you. Go cry somewhere else you poor baby, let me get you some diapers and cleenex so you can leave now.

mibbzz - February 6, 2013, 4:48 pm

Thanks for this checkign it out right now hope it works:D

I signed up trying this out, this is amazing of you kind sir!!! <3

durpmerp - February 7, 2013, 3:37 pm

Works, thanks. I tried 3 different login credentials on the register page before one actually worked..
Thank you

Griffin - February 7, 2013, 4:18 pm

Cool giveaway. I'm going to test it out >:)

edit: pretty good for a free booter.

You are very welcome sir. I hope you enjoy!

This is and will always be a free booter.

durpmerp - February 8, 2013, 7:35 am

Site down... Darn, was nice while it lasted D: The requested URL /booter/login.php was not found on this server.

Cletus - February 16, 2013, 8:23 pm

Still offering this, I reopened the booter back up.

Jaxk - February 17, 2013, 5:15 am

Signed up with Scare, thanks :o

Cletus - February 17, 2013, 2:39 pm

Glad everyone is enjoying this. Wonderful to help the community here :)

PandaVenom - February 17, 2013, 8:56 pm

Hey Guys this is insanely hard for a free booter :)

Here is a quick dstat

rainbowcarebear - February 17, 2013, 8:58 pm

Signed up- rainbowcarebear works for me and takes down connections thanks for the deal ;)

cheezyzap - February 19, 2013, 1:53 am

Thanks for this man, vouch for your awesome work =D!

TehHaxx - February 19, 2013, 3:36 am

Appreciate the free booter :)

Seeing as it says to use port 53, can it boot people off Runesacpe? Seeing as I use port 80 to boot them.

Either way, its a free service and I appreciate it :D

White Eagle - February 19, 2013, 3:42 am

(Jan 31, 2013 08:41 PM)CI?ssy Wrote: [\[CITE\]](#) This is a nice service! Although I'm not sure how to work it.

53 port right?

And for a homeconnection, should i use UDP?

You should use SSYN for a homeconnection.

The booter doesn't hit hard.

-ChroN. - February 19, 2013, 5:01 am

the time of this booter got some problems. as it's making only for 10 seconds attack by default.

sl??g?T of ???D - February 19, 2013, 2:22 pm

Thanks Plowwy for providing this for Free =)

pow_pow_xd - February 20, 2013, 10:05 am

Subby101 - February 20, 2013, 11:14 am

Long time no seen my friend I was the guy I think who introduced you to booters as I did a free boot

for you ages ago

I suggest blacklisting this ip

82.165.71.125

As it is your sites ip and it can be ddosed from the sites booter

Ajat1234 - February 20, 2013, 12:30 pm

What attacks for home? What for websites? And what for Minecraft servers :3

Puggelicious - February 20, 2013, 12:39 pm

thank you sir just signed up will be testing later thanks again :)

jacob843 - February 20, 2013, 2:33 pm

What are the terms? Can we DDOS only certain domains and IPs?
