Thread: [\[CHECK ALPHA SCREENSHOTS\] \[Program \] Encrypt your Files with CipherMe!](#)

Hydra_ - February 1, 2013, 5:42 am

[img]http://s4.postimage.org/5ftaj2zrb/Hello_HF_2_copy.png[/img]

Today I am coming to you with the project I have been working on lately, it's called "CipherMe"!

"CipherMe" is an encryption program which with, you can secure your important files which you don't want anyone to see the contents of it. And in case you want them back, you can easily decrypt them again, and start using them.

[img]http://s13.postimage.org/k0dabixev/Cihpher_Me.png[/img]

Info

This program is coded in Python, and it uses AES encryption.

Pictures of the prgoram after making GUI and adding some updates

I Hope you Enjoy the program, please leave your opinion in a comment and your criticisms ?

Don't forget to Check my Facebook Page, down here in my signature

Reverse Engineer. - February 1, 2013, 5:43 am

Thanks for sharing this I will try this out right now :)

Rhynorater. - February 1, 2013, 7:28 am

Nice program dude!

With the next version you could try splitting the files in two, so you need the second part for the files to be decrypted. Just a thought, nice work though!

-Rhynorater.

MR.FREE - February 1, 2013, 9:29 am

I got to beta test this first, wooot; grats on the release.

-Legacy- - February 1, 2013, 12:06 pm

This really has nothing to do with Python other than the fact it is written in it. Technically, it should be

in this forum: [Hacking Tools and Programs](#)

Looks decent, would be better if it was in a GUI. Not going to test as the source was not released.

Rhynorater. - February 1, 2013, 1:51 pm

He is right Hydra, if you aren't going to release a py file, I'll have to move this.

Hydra_ - February 2, 2013, 12:34 am

Honestly, I was confused where to put this program, and since it doesn't relate to Hacking I found it can't be put here in Hacking Tools and Programs forum, but it's coded in python so I put it in Python forum.

Anyway it's Okay :)

*****WOLF***** - February 2, 2013, 1:36 am

Thanks for sharing this tool! Nice program bro!

4RG0S - February 2, 2013, 1:42 am

Thank you for sharing this, I will try it out :)

TheHackerZmaim - February 2, 2013, 2:05 am

Thank you this tools i will try it now

G Dragon - February 2, 2013, 5:50 am

Thank you for Sharing ! this is really cool.

Hydra_ - February 2, 2013, 9:17 am

thank you guys, I really hope you enjoy the program ?

Elements. - February 3, 2013, 8:20 am

As always, beautiful! <3 Keep it up baby

Hydra_ - February 4, 2013, 2:48 am

Cyba - March 9, 2013, 6:44 am

Thanks for the program, I love it so much! :D

IceTimux - March 9, 2013, 7:52 am

Guys stop scanning on VirusTotal! it automatically distributes the file!

sasue11 - March 9, 2013, 8:13 am

(Mar 9, 2013 08:52 AM)Dolphin-IceTimux Wrote: [\[CITE\]](#) Guys stop scanning on VirusTotal! it automatically distributes the file!Yeah,guesseed that when one of their testers opened the virus(I posted a rat and was like wtf when it said a new user had been added cause I hadn't shared it with anyone only on vt T_T).Anyways going to test it ;)

PA77 M8 - March 9, 2013, 8:52 am

how the f**k do i use it haha im stuck on the path section please help the thing i want crypting is on my desktop how do i get to it i cant cd..

fdigl - March 9, 2013, 10:52 am

(Mar 9, 2013 09:52 AM)PA77 M8 Wrote: [\[CITE\]](#) how the f**k do i use it haha im stuck on the path section please help the thing i want crypting is on my desktop how do i get to it i cant cd..

Enter the file path of the file you want to encrypt/decrypt. Keep in mind, to be able to use or read the file again, you must decrypt it first.

Also, good share OP! Is drag-and-drop supported/will be supported in the future?

(Like for decrypting, add a filename prefix or suffix to the file and it will detect whether to decrypt or encrypt it when dragged onto)

khanrose - March 9, 2013, 1:48 pm

after i sign up, i cant login with the account that i made
i tried 100 times still the same

Cody8295 - March 9, 2013, 1:49 pm

Is there an advantage to this program other programs don't have? What type of encryption does it use?

Ajet - March 10, 2013, 9:16 am

Wow thanks for this tool helps alot!

Hydra_ - March 10, 2013, 11:51 am

(Mar 9, 2013 09:52 AM)PA77 M8 Wrote: [\[CITE\]](#) how the f**k do i use it haha im stuck on the path section please help the thing i want crypting is on my desktop how do i get to it i cant cd..

lol man, Okay just type the path of the file, like:

C:\users\the-hydra\desktop\me.jpg

and if the file is in the same directory of the program just type the name of the file directly, like: me.jpg

Any problems? contact me, check my Signature.

(Mar 9, 2013 08:52 AM)Dolphin-IceTimux Wrote: [\[CITE\]](#) Guys stop scanning on VirusTotal! it automatically distributes the file!

And why should I do that?

This is a Crypter for files to get it secured, not viruses. And I must do this so guys here know that this program is clean and it's safe to download it. :)

(Mar 9, 2013 11:52 AM)fdigl Wrote: [\[CITE\]](#) Enter the file path of the file you want to encrypt/decrypt. Keep in mind, to be able to use or read the file again, you must decrypt it first.

(Like for decrypting, add a filename prefix or suffix to the file and it will detect whether to decrypt or encrypt it when dragged onto)

Thanx buddy.

And Yeah. I will make it easier to use in future with more features and I am going to make a GUI for it.

(Mar 9, 2013 02:48 PM)-Persian Wrote: [\[CITE\]](#) after i sign up, i cant login with the account that i made

i tried 100 times still the same

How is that, I'd like you to contact me via Skype: the_hydr4

I hope u use it :)

(Mar 9, 2013 02:49 PM)Cody8295 Wrote: [\[CITE\]](#) Is there an advantage to this program other programs don't have? What type of encryption does it use?

This is a basic program for encryption and as I said above to the guy, in future it will be with more features and with GUI for the easiness of usage.

It's Coded in python and It uses AES encryption.

0x003 - March 10, 2013, 12:10 pm

Nice program mate

Thanks for sharing yoo !..

sLeaks - March 10, 2013, 2:32 pm

Wow thanks for sharing this tool helps alot!

Hydra_ - March 11, 2013, 12:11 am

Thank you a lot guys, I am glad you all like the program.

Time Lord - March 15, 2013, 7:37 am

Thanks you for sharing :) You are the best.

Almost Einstein - March 15, 2013, 12:20 pm

Thanks for this in advance! :D You save my life bro! :)

kristina - March 15, 2013, 12:25 pm

Ugh, you know, you can just use the OpenSSL frontend? It can produce encrypted files in Blowfish containers, which you can later decrypt.

For example:

Code openssl enc -aes-256-cbc -salt -in INPUT_FILE.bin -out OUTPUT_FILE.bin

Hydra_ - March 15, 2013, 10:57 pm

(Mar 15, 2013 07:37 AM)Time Lord Wrote: [\[CITE\]](#) Thanks you for sharing :) You are the best.
You are welcome, Enjoy :)

(Mar 15, 2013 12:20 PM)Almost Einstein Wrote: [\[CITE\]](#) Thanks for this in advance! :D You save my life bro! :)

Well, I am glad I hear that :)

(Mar 15, 2013 12:25 PM)kristina Wrote: [\[CITE\]](#) Ugh, you know, you can just use the OpenSSL frontend? It can produce encrypted files in Blowfish containers, which you can later decrypt.

For example:

Code openssl enc -aes-256-cbc -salt -in INPUT_FILE.bin -out OUTPUT_FILE.bin

Well then, now you have two methods to encrypt files :) thanx for the addition :)

BTW, I will modify the program, adding some features adding GUI for easiness of usage.

Sp0nk1 - March 16, 2013, 2:56 am

Been looking for this one, Thanks! 35chards

BeggFoMercy - March 16, 2013, 12:41 pm

Seems Epic , Good to see some HQ scripts that are really useful !

mukwah91 - March 16, 2013, 1:50 pm

Thanks man, using it to protect a very important .txt file with ti :D

Hydra_ - March 18, 2013, 8:22 am

I am glad you guys like it, I didn't expect this replies .. wow!

I hope the next version get your likes ?

z3r0.d4rkn355 - May 14, 2013, 3:25 am

Every tool you released is of HQ! Great work. Do you have plan to share source code?

Jesus666 - May 14, 2013, 4:25 am

why did i need too make and user ? on this program

why did i need too make and user ? on this program

and why did a see a voice map coming op on my dekstop and
disapere after a second ,

i know this kinda stupid question but a need to ask to learn

Hydra_ - May 15, 2013, 9:05 am

(May 14, 2013 04:25 AM)LulzTard Wrote: [\[CITE\]](#) why did i need too make and user ? on this program

why did i need too make and user ? on this program
and why did a see a voice map coming op on my dekstop and
disapere after a second ,

i know this kinda stupid qustion but a need to ask to learn

I will start from the end, the voice is programmed to be done as kinda something cool with the program, and making a profile is something for the encrypting procedure.

(May 14, 2013 03:25 AM)z3r0.d4rkn355 Wrote: [\[CITE\]](#) Every tool you released is of HQ! Great work. Do you have plan to share source code?

Yeah, someday I will release the source code for the program on Python forum.

As for this, to find the path of the folder, since you are using windows 7/vista type in the following for path.

Code C:\users\%username%\Desktop\folder

Where %username% is replaced with your current username. Hope this helped!

This is awesome! Nice share broski!

shonitxx - August 10, 2013, 3:29 am

lol ..ur program is for safe important files brother..if this is the main aim then your program is useless brother..

see i have made two accounts with your program ..

encryt the files from 1st and then decrypt the files from 2nd..

now 1st one can't get untill 2nd one encrypt it back..

and anyone can make an account and can fuck the IMPORTANT file for the revenge of not giving him my important file..

do work on it brother

there should be only one signup at the starting..

Hydra_ - August 10, 2013, 8:35 am

Okay thanx for the feedback bro, but I am not quite sure I fully understand your English in first comment, unlike the second one. So I will think about following your suggestion @the second comment. ?

(Aug 13, 2013 06:25 AM)shonitxx Wrote: [\[CITE\]](#) i'm not saying that it is not useful.. it is useful only if you make only one signup for one pc

Unlike what I thought, I think this is an advantage of it, as it can be used for many users on the same PC as long as each one has different KEY to use, and that actually happens, each user will register would have a random unique key to use.

Thank buddy for your feedback. ?

(Aug 13, 2013 08:08 AM)rajivsunny29 Wrote: [\[CITE\]](#) it ask for id password.. what is the password and id

You have to register (sign up) to sign in and be able to use the program.

(Aug 13, 2013 08:39 AM)CYB3RB0X Wrote: [\[CITE\]](#) Nice tool great work :) i find it pretty useful

Nice Post Man thanks for the Share..

Hydra_ - September 17, 2013, 11:59 pm

You are welcome guys, I just got finished from updating the program, I posted screenshots in top of the thread.

Stefa_Car - September 19, 2013, 6:04 am

Best bro you are the bestt best bestt

globemasters - September 19, 2013, 6:48 am

Thanks a lot for Sharing. this seems to be an awesome tool..

demonator the original - September 19, 2013, 9:58 am

looks pretty good, goodluck mate :)

Freddy_g - September 19, 2013, 11:54 am

thx for sharing this program :)im gonna try in out now

syros - September 19, 2013, 3:25 pm

Thanks for sharing this I will try this out right now :)

mr.zx - September 19, 2013, 7:58 pm

??????wwaaww nice

Hydra_ - September 21, 2013, 1:39 am

You are welcome guys, try it out and give me feedback if you wanna :)

skullzz_2nv - September 24, 2013, 8:28 pm

Wow, I used this and it works perfectly.

Thanks a lot mate!

ddol - September 24, 2013, 9:41 pm

Will the file be marked as a virus after cipherring it?

GhOsTI33T - September 24, 2013, 10:11 pm

will this crypt a server ? like can i crypt a dc server with this to spread ?

putanginamo - September 24, 2013, 10:31 pm

cant run on windows 2008 server

..Thanks

Guys I said and I quote: " CipherMe is an encryption program which with, you can secure your important files which you don't want anyone to see the contents of it", so this is for normal files if you apply it on any file, you will nor be able to see the contents, so this is not for VIRUSES.

(Sep 24, 2013 10:31 PM)putanginamo Wrote: [\[CITE\]](#) cant run on windows 2008 server

I never said I was going to be using it for virus use. I simply asked if it was going to be detected as a virus. Also, mind increasing the file size maximum? I tried it out, but was unable to launch because of a message

Okay, it will not be detected by AV ?, and I don't think I understand your second part of your reply! and What message you get?

Okay, there is a problem with the image, would u reupload it please?

ddol - September 26, 2013, 4:09 pm

<http://prntscr.com/1to3by> There you go

Hydra_ - September 26, 2013, 5:14 pm

GalaxyMS!!! why did you rename the program?!!! o.O

And I don't know the issue, you are the first one of the +1k who dealt with the program facing this problem, try to use Cipher Me from another Computer.

ddol - September 26, 2013, 6:16 pm

problem, try to use Cipher Me from another Computer.No thats the file i had it output o-o

Hydra_ - *September 26, 2013, 6:27 pm*

Ah Okay, if you encrypted it and you wanna use it you have to decrypt it back first! #Cryptography
