About

So basically I made a site like Youtube, it's not a clone of Youtube but generally a site where teens can hangout. seen as though sites like Youtube tend to frown upon the 13-16 year olds I decided why not have a media sharing site that lets people around that age have a hang around spot? as you can see it's sort of in the beta phase.

Please don't take into mind that this is a copy or replica of YT. this is just a media site like any other where people around the young age can post videos of their favourite music. or themselves.

The site Link is:

<http://thepiratedock.es>

Ideas?

Feel free to PM me or email me on the site if you have any ideas or thoughts in mind that could benefit the site in any way. I appreciate any feedback. please don't mind the name. bear in mind it's the only name I could use for it.

You could also help by sharing the site around with friends or family. I want to get this site out to help other teens and that connect in a way that makes them feel safe and secure, but in the same way be able to talk to other teens and socialise with other Teens.

Thanks

"TO WATCH VIDEO PLEASE LOGIN"

Why don't you make it so unregistered people can watch videos?

The Lost Prophet - February 2, 2013, 3:58 pm

I'm sorry, I will fix that now. I didn't realize that was activated.

+Affinity - February 2, 2013, 4:02 pm

This will eventually either:

1. Die out.
2. Turn into a website full of crappy videos.

Do you have moderators?

- What's up with the title?
- Why would you want to narrow down the public to only teens?
- Isn't YouTube easier regarding uploading and sharing videos?

Svnday - February 3, 2013, 6:08 am

The title.. Very misleading. Also, not only are you hoarding traffic with a typical typing error to another big hosting site, you have the same (somewhat theme going)

Also, you said YouTube four times.. Youtube.
