<https://i.imgur.com/Q2xxqeO.gif>

Keeps saying invalid image url .

df?

Amphibious Garbage - February 2, 2013, 5:41 pm

Download it to you computer and then upload it directly through the usercp

TheVortex - February 2, 2013, 5:43 pm

(Feb 2, 2013 06:41 PM)NETWORK Wrote: [\[CITE\]](#) Download it to you computer and then upload it directly through the usercpRegular members can't upload a avatar. So he will have to use a link.

Op try uploading it to minus or imageshack and try it again.

Anchor - February 2, 2013, 5:58 pm

Minus just gave me a SQL error aswell.

SoulZeh - February 2, 2013, 6:02 pm

I don't think normal users can have animated avatars, you have to make it .png or .jpeg.

I tried a regular image as well. "Invalid image url"

Positive - February 2, 2013, 6:22 pm

The given image (.gif) is not only too large in height/width, but also in size (kb).

Nyonic - February 2, 2013, 6:24 pm

Resize the gif and then try to add it, and try to cut down on size in kb.

Gentlema?n - February 2, 2013, 6:28 pm

The size of your image is just fine, you only have to fix the KB.
It is passed 50KB.

Dallas Cowboys - February 2, 2013, 6:31 pm

Uploading signatures, and etc are down for some reason. Has been reported already.

It is passed 50KB.

Correct; on my screen it showed up as 160x220 for some odd reason.

Anyway, OP, please get it down to at least 50kb to add it into your avatar display picture.
