Maybe you need more posts since you are new. I'm not sure, maybe download it, and try choosing the image and trying again.

Use a different hosting site, such as [imgur.com](#).

To get a image from your computer you must be upgraded to [L33T](#).

Normal users can only use avatars with direct links.

Jay? - February 3, 2013, 2:27 pm

Upload it rather than hotlink. This should solve your problem. :l

Maghbool - February 3, 2013, 2:43 pm

This shits buggy as hell, yeah the avatar thing is so buggy. Like I upload/add one and it shows up invalid.

I was waiting for Omni to fix this but I guess someone should report it.

Try removing the current avatar you have, then try adding the link.

Senior Sherlock - February 3, 2013, 4:08 pm

Here, try it now

@Positive

I'm having the same problem, can't change my avatar.

Positive - February 3, 2013, 4:27 pm

I will talk to Omniscient to try and get this resolved.

Dubai - February 3, 2013, 5:02 pm

I can help, as i had trouble with this once.

1. Get any image
2. Upload it to imgur
3. then go to picesize.com
4. Resize to right format and get link
5. Go to link and use direct link

There you go man.

GI?ck - February 3, 2013, 5:04 pm

Just use another image hosting site.

That should solve the problem.

Or get your post count up.

Gjaosu - February 3, 2013, 5:59 pm

Upload to photobucket.com

I use this and success

Positive - February 3, 2013, 6:09 pm

I can't add an image to my signature either, nor change my avatar even though I have the right sizes.

I have messaged Omniscient.

Soulmate - February 3, 2013, 6:20 pm

I think this is a MyBBwide problem. I can't do it on any others either.

SIM-1349466 - February 3, 2013, 8:53 pm

This happened to me a few times. Wait an hour or two and it should be fine.

Purelex1981 - February 3, 2013, 8:54 pm

Thats weird. Maybe its the image size?

Maybe you haven't clicked "Remove avatar" which you have on now and then put the link in?

Edit: Look at my avatar... I actually just put the link in and it works fine.

Hikki - February 3, 2013, 9:05 pm

Its a HF problem. Try after some minutes and it would be fixed.

You're correct, the link is also working for me. I think the problem somehow has gotten fixed.

Trafz - February 4, 2013, 7:43 am

I was having the same problem earlier. Haven't tried in a while but I never resolved it.

Anchor - February 4, 2013, 11:11 am

I hope omniscient fixes this soon. ?
