Thread: [\[Public Service Announcement\] Keep our files FUD!](#)

x1029 - March 19, 2010, 2:06 pm

STOP SCANNING ON VIRUS TOTAL

This is perhaps the worst thing a person could do to a stub, a program, a crypted file, or a new virus! Virus total scans it, analyzes it then passes it on to a team of analysts who spend their time dissecting suspicious files then updating their anti-virus software! It's a bad thing to do! Want to know why? It makes our files become detected, either with false positives or with real positives! BOTH ARE BAD.

Want to know what you should do instead? Goto: [No Virus Thanks](#)

And scan your file using these four simple steps!

Step one: Navigate your browser there.

[img]http://i198.photobucket.com/albums/aa232/javatm/step1-1.jpg[/img]

Step two: Upload your file.

[img]http://i198.photobucket.com/albums/aa232/javatm/step2-1.jpg[/img]

YOU MUST CHECK THE BOX OR IT WILL STILL PASS THE FILES AROUND TO AVs

Step three: Wait a minute or two.

[img]http://i198.photobucket.com/albums/aa232/javatm/step3-1.jpg[/img]

Step four: Profit.

[img]http://i198.photobucket.com/albums/aa232/javatm/step4.jpg[/img]

Wasn't that easy?

KEEP THIS TOPIC ALIVE.

This is simple as fuck information, but people DON'T do it.

Newer members are BEFUDDLED by the idea of Virustotal.

Lets save our files and our cryptologists the trouble of remaking a stub every day because some smith decides LOLSCANVIRUSTOTAL.

Thanks!

gazanfar - March 19, 2010, 2:09 pm

Nice!!!Pretty basic things everyone should know

It's basic as HELL. But a kid just fucked over my FRESH stub then charged back because he claimed it wasn't FUD. And I'm like... go fuck yourself...

w4rr3z - March 20, 2010, 7:03 am

Yea good thread, hope the (noobs) are reading this!

averageuser - March 20, 2010, 8:42 am

I don't think this can be stopped. There will always be people who scan at virustotal either because they are trolling, or they are just completely fucking stupid. It's just a part of life, and we all have to deal with it. This is why people who are releasing crypters get bitched at because the stub isn't FUD anymore. It's a real shame, but we will just have to deal with it, unless the people releasing them finds a fool-proof way to prevent leechers, virustotal scanners, etc..

SUPERIOR - March 20, 2010, 1:26 pm

hehe, i bet even after reading this people will keep scanning on VT :D
but thanks alot, number of VT fans must be reduced after reading this thread tho
good job bro

Thanks ;). Lets keep this up on top guys xD

Thammawat - March 22, 2010, 11:11 am

Every new member should be infected by an admin and get their fucking hosts.ini edited to (spinmeat).com when entering vt

Ain't that the truth.

teh_troll - March 22, 2010, 11:26 am

Thanks! Even as a total and complete NOOB I know better than this. What is wrong with some people eh?

dime111 - March 22, 2010, 12:01 pm

well i do not even belive in NVT too let alone VT
specially when you check do not distrbute
Im sure they will do this distrbute

x1029 - March 22, 2010, 12:10 pm

It's better to have something out there as a disclaimer than nothing at all.

tssge - March 22, 2010, 12:30 pm

Bump for the epic info here, that every n00b must read. This SHOULD BE STICKIED !

(Sorry for CAPS)

x1029 - March 22, 2010, 12:31 pm

^_^, seriously... I'm just sick of all these kids coming in and destroying what isn't theirs.

Blad3 - March 22, 2010, 12:31 pm

Thanks you now we need that all the newbies will read this

x1029 - March 25, 2010, 1:27 pm

^ For truth.
For truth...

d0rhk - April 1, 2010, 9:51 am

bump for good info

2sh0rt.

x1029 - April 1, 2010, 11:58 am

Double bump for better info.
