Thread: [Top Notch Image Uploading Site?](#)

Grin - February 4, 2013, 8:57 pm

Mine was imgur, but I think I may need to make a switch.

I would like one that does not ruin image quality, and it won't get taken down in like 1 year. It has to be sort of long lasting.

Also, with the service, I'd like a nice screen snapping program as an alternative to hyperdesktop. :D

Thanks guys.

Not [censored], please.

Not sure about minus.

Not sure about photobucket.

Definitely not tumblr.

I noticed that I'm shooting a lot of sites down. Sorry about that.

Go for Minus, I like their website a lot and I use them for my Mobile Uploads

I've been using imageshack.us for about 2 years now

kinda sucks cause you've gotta sign up now

but every image I've uploaded there, none have been taken down yet

They are known for hosting more ads than images. ? That's why I never liked it lol.
