Thread: [Weather.app being fixed! @pod2g \[FIXED! UPDATE VIA CYDIA\]](#)

Tetrahedra - February 5, 2013, 1:50 am

You may notice that the weather application on your device instantly crashes when you try to open it.

Pod2g stated on twitter that they know what the problem is and how to fix it. The evad3rs team are working on modifying the evasi0n tool and will also push a fix to already jailbroken users.

@Pod2g: "About Weather.app, we now know how to fix it. We are working on modifying evasi0n app and on pushing a fix to Cydia for already jailbroken."

It shouldn't be too much longer until you can use the app again - I personally don't use it because I use another one.

Go to changes and upgrade the available changes.

Genius1223 - February 5, 2013, 1:51 am

Who uses the weather app anyways :P
I like using weatherbug!

D3xus - February 5, 2013, 3:36 am

Who uses the weather app? Really? ?
Anyways, nice to hear that they're on it.

Genius1223 - February 5, 2013, 4:01 am

lol maybe thats why they didnt bother checking the weather app when they were fixing bugs xD

TechApp - February 5, 2013, 4:39 am

To the two people above, I use the weather app every morning. When I'm standing naked in my room deciding what to wear, I whip that baby out and look. This morning I actually had to turn on the TV and look at the weather on the TV... Just a big hassle. Anyways glad it's not just me like I thought it was!

Sparkfear - February 5, 2013, 9:03 am

Wondering if I'm the only 1 but it works perfectly fine for me and I jailbroke my device.
iOS 6.1 4s.

Rob. - February 5, 2013, 9:48 am

It works fine, unless you install something. There is a specific package (WinterBoard is my guess) that glitches up with the Weather app. Before, I had it working fine, but now it's not working. Even after the jailbreak and installing packages it worked, but I think now WinterBoard is the problem

i would tell you a easier solution but you will just -rep me because UB3RS hate it when i say something they dont like :L

iElement - February 5, 2013, 4:02 pm

My weather application works perfectly fine.

(Feb 5, 2013 05:08 PM)xadamxk Wrote: [\[CITE\]](#) Honestly, who cares about the weather when you have Cydia?

And working repo's that is ??

Yes, Cydia owns over all. Got weather widgets everywhere on my phone, who needs those boring default stuff :P

Grin - February 5, 2013, 9:55 pm

You can also power fix it, if you have the ability. (If you jailbroke when the first jailbreak came out., you're familiar with this)

Dreams - February 6, 2013, 8:29 am

Everyone. This has been fixed. Update via cydia :)

Grin - February 6, 2013, 8:31 am

Thanks for the update. I am updating now. ;)

vDeviize - February 6, 2013, 8:55 am

still dont work xD i only want it for my android dreamboard theme

haid123 - February 6, 2013, 8:56 am

My weather app is Working perfectly lol

Edit: or wait no it's not it was working when I jailbroke it now it crash every time I open it

Grin - February 6, 2013, 9:55 am

That's why there's an update for the fix.

vDeviize - February 6, 2013, 12:55 pm

yes i updated about 10 min after the update showed in cydia i updated and it still wont work...

Grin - February 6, 2013, 1:12 pm

You're supposed to reboot your device.

vDeviize - February 6, 2013, 1:23 pm

i had to when i updated and i have recently because my battery died

Tetrahedra - February 6, 2013, 7:35 pm

Fixed. There are two changes I recommend you download now from Cydia.
