HOW TO FIND ANYONE'S IP ADRESS

- 1) Log in to your email.
- 2) Go to WhatIsTheirIP [Here](#)
- 3) Enter your email adress where it says "Your Email Address:"
- 5) it should say "Congratulations! Everything's setup."
- 6) it should then say "Please tell your friend(s) to check out any of the following links": You will get some links like Bvlog & honda.
- 7) Send the links to your victims and on the links it should say there was an error on the page.
- 8) check your email. You will get a message in your junk saying their IP has clicked your link.
- 9) Open it! It will say their State, ZIP/Postal Code & Latitude & Longitude.
- 10) Have fun looking at People's Houses & DOSing their IP's. :)

Man this is some really advanced method.. I can't contain my excitement!!!

/endsarcasm.

Personally, I think [GetThierIP](#) is alot better and more efficient. But, this method works too...

Osuka - February 5, 2013, 10:13 am

Nice small tut, But Really all the [Legion] tutorials people are making really need to come up with their OWN IDEAS and not just redo some that area already on this forum. :(
