Quick GIF Creator

by Mephobia

- Information -

This is a small, lightweight, and easy to use program that will allow you to take animated GIF images. Using this is just like using a screenshot program. You first select a recording region, then you use hotkeys to start and stop the recording. Alt + A and Alt + S, respectively. Enjoy the application, and leave feedback because I released the source and the bin!

- Pictures -

- Example-

Spoiler [\(Click to View\)](#)

As you can see, there are a few recording bugs, but I couldn't figure out why, so I thought maybe someone here can try fixing it. That is why I also released the source.

+Bourbon - February 6, 2013, 3:06 pm

Use your GIF creator to create a GIF of you using your GIF creator. GIFception.

?Mephobia - February 6, 2013, 3:11 pm

I updated it with a GIF, read above the gif too. Maybe someone can help.

Foursenal - February 6, 2013, 3:37 pm

WOW This is quite awesome! Hopefully a coder can help you to make it perfect! Also, add a loop after the GIF is done?

Cody8295 - February 6, 2013, 3:46 pm

I wish you'd post the source in a spoiler so I can see it without downloading. Too lazy.

Also I'm pretty sure the bug is in your screenCapture class, something to do with the BitBlit function..

Percocet - February 6, 2013, 3:55 pm

The only thing I would fix about it, would be to capture the frames at a faster rate. It seems a little laggy in my opinion.

Other than that, not too bad!

?Mephobia - February 6, 2013, 3:58 pm

Yeah. I may change the screen capture method. Maybe it will make it more smooth.

jeiceei - February 6, 2013, 3:59 pm

its awesome job dude but you should add reloop i think

TraptCode - February 7, 2013, 12:23 am

Why are you closing your device context each call. If you are making multiple block transfers, you should do it all on one device context.

SkyRider2 - February 7, 2013, 3:44 am

Very buggy, needs abit of work.. other than that.. good job :)

GammaRay - February 7, 2013, 4:27 am

Very buggy. I agree. Can't complete a recording without errors popping up. Was really excited. :(

Hope you can fix it because it looks stunning and simple :)

OneTXxL - February 7, 2013, 7:02 am

Good image quality this is a good source thank you :)

nathan72389 - February 7, 2013, 7:11 am

7+meg for such a crap gif?

not being mean, but i will stick to camtasia.

?Eatos - February 7, 2013, 7:33 am

HQ as always! Thanks for sharing it with us man!

Sho?kwave - February 7, 2013, 8:24 am

Work on the size of the gifs, and also make a box flash whilst recording (like camtasia)

Yui Asuna - February 7, 2013, 9:31 am

Good job !

I like this kind of release (Not 1337 h4x0r etc...), and I was looking for something like this !

Thx ur a 1337 c0der i luv yu ! XDD

xGTx - February 7, 2013, 10:08 am

Love this, Only problem is file size, If you could make the file size of the gif's smaller it would be brilliant :D

?Mephobia - February 7, 2013, 12:19 pm

Well yea, there are a lot of problems, and I know... I was wondering if someone wanted to fix it up.

I've been busy with other things lately. The file size is also very big, I know. But I did not get errors when recording.

KingCobraXD - February 7, 2013, 12:44 pm

Lol. What a coincidence. I was working on something similar a day ago. =D

Lol. Seems like you're trying to follow naming conventions though it isn't very consistent throughout the code. Personally, I'd use Pascal Case for VB and Camel Case for every other language whose syntax is similar to that of C (C++, C#, Java, etc).

GammaRay - February 7, 2013, 1:08 pm

(Feb 7, 2013 01:19 PM)?Mephobia Wrote: [\[CITE\]](#) Well yea, there are a lot of problems, and I know... I was wondering if someone wanted to fix it up. I've been busy with other things lately. The file size is also very big, I know. But I did not get errors when recording.

Maybe see if Shockwave or Aeonhack would wanna do it? If you'd like I can ask them for you. But they are both great programmers with heaps of GDI experience.

johnny66 - June 1, 2014, 3:17 am

Thank you for sharing this it has been useful for me!<3 (nohomo)

SIM-1096442 - June 1, 2014, 6:28 am

It will be quite useful, thanks a lot.
