Thread: [E-Book bazaar vs Premium E-Book bazaar](#)

What are the advantages of disadvantages of both?

Which one is better?

Why do ub3rs and l33ts use the regular e-book bazaar when they have access to the premium one?

some e-books are not up to standard, some are rejected others just sell pointless e-books, soon I am upgrading all my e-books to premium bazarr, but the review waitng taking for ever!

All of the ebooks in the Premium section have to be reviewed by certain people, and it can take a while. Sometimes people just don't want to wait for their ebook to get reviewed. It can be for other reasons as well though.

Premium Ebook bazar is reviewed before publication of thread.

It is not only linked to the membership level like Premium and secondary seller section.

Yeah I just submitted my e-book to premium, do you know if you'd be allowed to put a temp thread up in regular bazaar while yours is being reviewed?

I like the premium one more, because the reviews are so much more objective. I like that. And the publishers havent got anything to hide.

They have it there since it has to be officially reviewed to fit in premium
