Thread: [\[Tut\]Darkcomet 5.3.1\[Portforwarding\]\[No-ip\]\[SJDB/JDB\] Detailed guide.](#)

Squeak - February 8, 2013, 12:04 pm

NOTE: THIS THREAD IS STILL UNDER CONSTRUCTION ADDING PICTURES RIGHT NOW.
Im making this guide because alot of people are having problems with it.

In this guide I will explain how to :

- 1-Set up no ip.
- 2-Portforwarding.
- 3-Set up darkcomet.
- 4.Create a Silent java drive by.

First of all you need to do this

Register here: <http://www.no-ip.com/newUser.php>

And download this: <http://www.no-ip.com/client/ducsetup.exe>

Download DarkComet: <http://sharesend.com/xy5cy70l>

DarkComet download link came from this thread:

<https://hackforums.net/showthread.php?tid=2632776>

Please disable your antivirus/firewall/windows defender so the RAT will work succesfully.

1.No-Ip.

Go to <http://www.noip.com/> and sign in.

Click on add host

Spoiler [\(Click to View\)](#) <http://i.minus.com/jUDEFliJQXRLO.png>

Dont change anything just typ in any random name and a any ending[Doesnt matter what name or ending]

Spoiler [\(Click to View\)](#) <http://i.minus.com/j7uv84Cr6rJzt.png>

Open duc 3.0 log in and click on select hosts and select your host and click save.

Spoiler [\(Click to View\)](#) <http://i.minus.com/j20CIFTgC3SMY.png>

Spoiler [\(Click to View\)](#) <http://i.minus.com/jMb0mKd7YLYho.png>[/URL]

2.Portforwarding.

Open up cmd and typ in IPCONFIG

A bunch of stuff will pop up now look for default gateway next to its there are some numbers typ them in your search bar.

Spoiler [\(Click to View\)](#) <http://i.minus.com/j9Mp08fdyg460.png>

A log in screen will op up log in. If you dont know what it is look underneath your router.

You will be logged in in your router.

Click on advanced settings and now on portforwarding.

Spoiler [\(Click to View\)](#)[/URL]

Make sure to click on enable portforwarding.

Spoiler [\(Click to View\)](#)[/URL]

Okay go back to your cmd and typ again IPCONFIG and look for IPv4 adress.

Spoiler [\(Click to View\)](#)[/URL]

Typ you IPV4 at Local Ip your options should look like this[You can choose a other port]

Spoiler [\(Click to View\)](#)[/URL]

And click add.

Extract DarkComet to your desktop and open darkcomet and accept the EULA.

Left in the corner click on Darkcomet-RAT and than client settings.

Spoiler [\(Click to View\)](#)[/URL]

Click on no ip updater and fill in your info.

Check auto update your no-ip dns When your ip changes and click on update.

Spoiler [\(Click to View\)](#)[/URL]

Go to socket/Net and right click one of the first four lines and click add port.

Spoiler [\(Click to View\)](#)[/URL]

Change 1604 in the port what you port forwarded in my case 1604.

And click listen.

Click on Darkcomet-RAT-Server module-Full editor.

Spoiler [\(Click to View\)](#)[/URL]

Click on network settings and typ the name of your host and the port you portforwarded and click on Add.

Spoiler [\(Click to View\)](#)[/URL]

Build the stub and the file that has been created is your virus.

I recommend buying a crypter and make your virus Fud[Fully undetectable]so you will spread faster.

Just go to the premium seller section and look for one.

Silent java drive by/Java drive by

Made by : <https://hackforums.net/member.php?action=profile&uid=856824> Anonyws all credit to him download link:<http://ge.tt/3o7okxX/v/0>

Its very easy to set it up and it realy spreads 10x faster.

And remember I worked hours on this and posting thanks only takes 10 seconds.

If you got any questions or problems just pm me or post them here.

Also just give me tips on tips on what to improve in this guide or show me grammar mistakes so I can change it.

Aura - February 8, 2013, 12:10 pm

Nice Tutorial man keep it up.

Really hope all the new members will come in this thread RIGHT AWAY when they join the Forum and stop asking questions like "H0w d0 1 H4ckz00rz huehue ?!one!!?!?11?!?" and actually read and learn.

White Eagle - February 8, 2013, 12:11 pm

Nice tutorial, i will try the tutorial later.

Thanks for sharing.

Squeak - February 8, 2013, 12:24 pm

Thanks for sharing.

Thanks guys I hope this will help all the new people because I see like 10 threads a day with How do I hack??

Xeditz - February 8, 2013, 12:27 pm

nice tutorial might use it or send it to people who need it keep it going

~Xeditz

you are a skid - February 8, 2013, 12:29 pm

ive been on this forum for just over 4 hours and i already can see this "darkcomet" taking it over.

im sure there is a tutorial section here, post there not in this section. i would like to see some decent threads soon.

Squeak - February 8, 2013, 12:47 pm

(Feb 8, 2013 01:29 PM)you are a skid Wrote: [\[CITE\]](#) ive been on this forum for just over 4 hours and i already can see this "darkcomet" taking it over.

I posted this here because every 10 minutes there will be someone saying How do I hack?? or I got a problem with darkcomet.

xbrxlunch - February 8, 2013, 12:55 pm

Nice tut, helped me out quite a bit. Thanks

Squeak - February 8, 2013, 12:59 pm

(Feb 8, 2013 01:55 PM)xbrxlunch Wrote: [\[CITE\]](#) Nice tut, helped me out quite a bit. Thanks

Thanks for posting I just finished adding all pictures.

I will add tommorow how to do it on a vpn.

xbrxlunch - February 8, 2013, 4:58 pm

One thing I have a an issue with is the portforwarding. I already knew how to do it luckily, but the way router gui's are laid out differentiate greatly. Your router gui just looks nothing like mine so it was a bit trickier.

(Feb 8, 2013 01:59 PM)Waluigi Wrote: [\[CITE\]](#) Thanks for posting I just finished adding all pictures.

I will add tommorow how to do it on a vpn.

zeru - February 8, 2013, 5:00 pm

i needed this i will look at this when i have more time later thanks

xbrxlunch - February 8, 2013, 5:07 pm

I can't tell if it's working or not. I ran the exe myself on my own pc, but it's not showing up in the list. Am I doing something wrong?

Superkawaii - February 8, 2013, 5:13 pm

how do i re fud a java "client.jar"

lucke100718 - February 8, 2013, 5:16 pm

There is plenty of those? But the "silent JDB" got me interested lol. Nice tutorial :)

danno99 - February 8, 2013, 5:18 pm

I used `Simple Port Forwarding Tool` its quicker and i still cant do it

UnknownCC - February 8, 2013, 6:16 pm

I'd love to know how to create a SJDB

Squeak - February 9, 2013, 1:17 am

Maybe you did something wrong with no-ip?

Th3PonyWizard - February 9, 2013, 3:42 am

Congrats OP, keep up helping the cancer.

xbrxlunch - February 9, 2013, 11:02 am

(Feb 9, 2013 02:17 AM)Waluigi Wrote: [\[CITE\]](#) Maybe you did something wrong with no-ip?
I guess you can't infect yourself. I was able to see the host when I had my friend run it. Thanks for reply though.

Also, can you pm with details about java driveby?

Squeak - February 9, 2013, 11:52 am

Im gonna post the link for the java drive by at the thread.

xbrxlunch - February 10, 2013, 2:37 pm

Need some good ways of spreading it now that I've got the java drive by set up. Any ideas?

Squeak - February 10, 2013, 2:38 pm

(Feb 10, 2013 03:37 PM)xbrxlunch Wrote: [\[CITE\]](#) Need some good ways of spreading it now that I've got the java drive by set up. Any ideas?Try Infecting habbo/rs/rsps users you will get alot slaves and make some \$.

Also did you crypt your server?

xbrxlunch - February 10, 2013, 2:46 pm

Yeah I made sure to crypt it. I'm returning to the hacking world, and I'm a little out of date with my terminology. So would you please elaborate on what habbo/rs/rsps is lol?

Squeak - February 10, 2013, 2:48 pm

Rs=Runescape

Rsp=Runescape private server[goodway to spread] <http://www.mmorpghtoplist.com/runescape>
habbo Its a hotel and with irl money you can buy items for in your room.

Black Blade - February 10, 2013, 2:51 pm

awsome guide thanks!! will defernatly try out!

yoghiHD - February 10, 2013, 3:03 pm

Also did you crypt your server?

what do you mean whit "make some \$ " !?! how can be it possible?

Are you talking about bitcoin?

Squeak - February 10, 2013, 3:04 pm

(Feb 10, 2013 04:03 PM)yoghiHD Wrote: [\[CITE\]](#) what do you mean whit "make some \$ " !?! how can be it possible?

Are you talking about bitcoin?

With ratting rs/habbo players he can get their passwords and steal their virtual items and sell them.

yoghiHD - February 10, 2013, 3:09 pm

sell them for real \$\$? :) i'm not practiced whit habbo! well thanks anyway for this tutorial ;)

Rasbora - February 10, 2013, 3:09 pm

When I try downloading the FUD JDB.zip nothing happens...? Can you upload it somewhere else please?

Squeak - February 10, 2013, 3:14 pm

(Feb 10, 2013 04:09 PM)Rasbora Wrote: [\[CITE\]](#) When I try downloading the FUD JDB.zip nothing happens...? Can you upload it somewhere else please?

<http://sharesend.com/b2n7085y>

Does this one work?

(Feb 10, 2013 04:09 PM)yoghiHD Wrote: [\[CITE\]](#) sell them for real \$\$? :) i'm not practiced whit habbo! well thanks anyway for this tutorial ;)

Yes you can sell those virtual items for in real life money.

SIM-574702 - February 11, 2013, 12:48 pm

Nice tutorial, maybe you should add some direct download sites needed for JDB.

Squeak - February 11, 2013, 12:51 pm

(Feb 11, 2013 01:48 PM)matemistic Wrote: [\[CITE\]](#) Nice tutorial, maybe you should add some direct download sites needed for JDB.

I will try to find some direct download sites and post in the thread.

Thanks for the tip.

supermaninewyork - March 19, 2013, 7:15 pm

i m having a problem when doing the no-ip updater, when i put in my information and update it say 'cant join remote server, trying later. please help

S k O r M - June 5, 2013, 11:00 am

YOu forgot "3." and "4." and adding some colors could be a good thing, no offense.

Thanks you from everyone :D

Creatiiviiity. - June 5, 2013, 1:21 pm

Is the silent JDB still working? I swear they do not work anymore with the new update?

Circlin - June 8, 2013, 9:36 pm

Hello, when I go to the No-IP Updater, I did everything as it showed, hit update, once I did that it said "Can't join the Remote server, trying later" Anything I can do?
