Hello ladies and gentlemen.

I proudly presents my new image hosting site.

This site is 100% free and doesn't requires registration.

Link: <http://img.whiteforums.net/> - The site is powered by Chevereto.

Note: To keep the site fast all uploaded pictures will be deleted every month. This is because of the disc space.

I also run a forum next to the image uploading site, so to keep my site fast I'll delete them but I will only do this until I get more space.

I may get money next week so I can buy some more space, so it's not permanent.
