Thread: [\[Guide\] In-App Purchases FREE!! \[Tweak\]\[Easy\]](#)

Rick R?ss - February 9, 2013, 5:35 pm

A lot of people haven't known about this because on Cydia it's not in front of your face. But I have a tweak so you can buy any in-app purchase without actually paying. MAKE SURE TO RESPRING YOUR PHONE BEFORE DOING ANY OF THE IN-APP PURCHASING, UNLESS IT WILL ALREADY KNOW YOUR APPLE PASSWORD AND CHARGE YOU.

First go to Cydia. Then Manage on the bottom.

Then Sources in the middle.

Now on the top right click edit, then on the top left hit add.

Type this in...

<http://system.in-appstore.com/repo>

After it's downloading. Open up the "InAppstore.com" source.

Install the first program on it.

After installing it. LET'S TEST IT!!

I'll make a list at the bottom of the confirmed games this works with. For now, let's try Temple Run 2.

Go to Menu>Get Coins.

Now Click the 500 Gem Pack and buy it.

ONCE THIS POPS UP:

Look at your stats and what you bought, YOU SHOULD HAVE RECEIVED IT!!!!

Confirmed Games

Temple Run 2.

BikeRaceTFG

Subway Surf

Hill Climb

Jetpack Joyride

Photoshop?

Army of Darkness

Leave a vouch below if this helped you out! Sorry to the people that already know this. I personally didn't, so I assumed some others would like this. ?

Unoticed - February 9, 2013, 5:36 pm

It wont work on games like IMobsters and Order and Chaos.

Alpha Bruh - February 9, 2013, 5:43 pm

I vouch for this method, I tried it and it works perfectly for most of my apps!

TwoFeesh - February 9, 2013, 5:50 pm

Actually, you forgot some steps. You have to install the 2 profiles on the website and use a certain dns for this to work. Otherwise it won't work. <http://system.in-appstore.com/>

Grin - February 9, 2013, 5:57 pm

Sir, did you seriously remake another tutorial on how to add a link of a source to your Cydia app and install a package from it?

Grin - February 9, 2013, 5:59 pm

Better than anything you have made recently lol
You clearly have not looked over some of my threads.

Especially the recent ones in the SRPP section. Perhaps you should.

You should read it. :)

I don't make much threads in this section because people have no idea what is going on and quality posts just die. Why bother?

I'm leaving this section.

With some of your replys on these threads.
But goodbye Grin, I shall see you eventually lol.

OP, thanks for tutorial. I gave you an Apple
Yeah thanks, sorry if this caused problems in this section lol. I'm not a pro at this and when I found out this source, I thought it was the best thing, dieing to share it with others!

Grin - February 9, 2013, 6:24 pm

The title is also misleading given that not all apps are supported.

Mikuflick for one isn't.

I understand. No worries, though. It keeps people alert and in line.

Hypnotoad - February 9, 2013, 9:50 pm

I use this way as well. Nice of you to post it for the people that didnt have it

Yes it does! 6.x and under as well.

SYLDD - February 10, 2013, 10:07 am

Yes, it works with some things. I have confirmed it works with doodle jump so far. Thanks for the share OP!

vDeviize - February 10, 2013, 11:43 am

do you have to be signed into app store because i tried it on clash of clans and it just said sign in or

create a apple account

Excluded - February 10, 2013, 12:00 pm

Vouch for this. Tested on Temple Run 2, and Doodle Jump.

?????Thr????? - February 10, 2013, 12:03 pm

Why not use IAPFree from Insanelyi?

Apparently you don't understand sarcasm, but -.-

Most people don't know how the app signing process works. lol

emizty - February 11, 2013, 10:09 am

Nice!

Gonna try this on the Photoshop app.

EDIT: It worked on Photoshop too

This seems to work on Jetpack Joyride as well.

SYLDD - February 12, 2013, 7:39 pm

It works with the game: Army of Darkness

if you have an iPad you must get this app. You can use this tweak for the coins, it is fucking amazing.

Thanks again for the share OP!

Abuser™ - February 12, 2013, 8:57 pm

You can just use iAPFREE. It is really great.

SnowballGaming - February 12, 2013, 11:19 pm

I can confirm it works on dead trigger.

Can also confirm it works on Zombie road trip

Pharaohs - February 13, 2013, 2:30 am

I'm sorry but I have to agree with Grin. All it is a tutorial showing you how to add a source.

?NoShame - February 13, 2013, 5:46 am

Isn't this the same as IAP cracker ?
anyways, great tutorial

Rob. - February 13, 2013, 5:47 am

Really isn't that unique of a tutorial, you are just adding a source, and installing something. Not really complicated. Sorry, but maybe find a better subject to create a tutorial on? Just a suggestion.

No. Those are server side purchases, which means the server checks to see if the money went through and all. It doesn't work.

For online games, they never work.

Qualification - February 15, 2013, 1:50 pm

3 words. Clash of Clans. <3

Will be adding this source, much appreciated :D

SwanyLean - February 15, 2013, 5:32 pm

hehe, I wonder why it did not work.

I have forgotten the certificates and DNS.

iCydiia - February 19, 2013, 5:24 pm

I use this one too.. Love it :)

Great tut for people that are new to jailbreak.

It's the same exact thing as iAPC, except iAPC is not updated for iOS6.

ImStefan - February 20, 2013, 11:30 pm

Does this work for FIFA13 please quote me!

Thanks sir!

Huntress - February 21, 2013, 3:56 pm

Followed the steps and downloading now

Hope it works! Thanks for taking the timeout to share this Op.

EDIT: Did not work

Would appreciate help if you know how to solve this. Thanks
