oh ya, please remove this

<https://hackforums.net/showthread.php?tid=264642> (Firefox Stealer)

old useless thread

Meteen - February 10, 2013, 5:23 am

Nice list. Lemme bookmark this :)

Kasic - February 10, 2013, 6:19 am

Thanks for the feedback! :) And I removed it!

Dark_Noodles - February 10, 2013, 6:40 am

Seems like you just looked up a bunch of useless threads and inserted them all into this one.
Way to go OP, way to go.

Uh yeah? You added a thread about a Firefox stealer that didn't even work. How is that not useless

w?rloct - February 10, 2013, 7:15 am

Awesome thread! It helped me a lot, to find some things!

One thing that didn't work that I removed now makes this whole thread useless?

Tomb Raider - February 10, 2013, 7:21 am

Thanks for the share gonna try making the keylogger one now :)

No. The fact that you didn't even check the thread date and the thread itself proves this thread is useless. Use your brain.

Holy crisp. A thread is dying when he didn't get any posts within more than a day or two. You just posted it yesturday...

And if a thread dies, let him do so. The only reason for that is because it doesn't help anyone anymore.

A thread is not a "he". It is an "it".

And I agree with you, this thread is useless and deserves to die.

Kasic - February 11, 2013, 2:17 pm

Thanks for the feedback and I can assure you I'm a he.

Damn, I just wish this thread would die.

New comers are going back on the old threads (the one you posted) and posting that it doesn't work, thus leading a bunch of dead threads on the main page, which pushes down the HQ threads.

Awesome, thread thank's so much for this .

Green Ranger - February 21, 2013, 2:54 pm

This site is where I first learned VB.Net. I was able to learn it in a few hours, and was creating basic applications like sql injecting tools using simple string manipulation. Would and do recommend to all

who wish to learn vb.net. <http://howtostartprogramming.com/vb-net/>

Kasic - February 23, 2013, 5:22 pm

EDIT:

Added more shtuff enjoy :D

And thanks for the feedback

As you just started with VB, don't think that c&p will get you any further.

Try to at least type the code and understand it.

If you are copy and pasting this of course, if not keep it up (:

ScriptKiddie1888 - May 3, 2015, 10:52 am

I don't copy and paste, Typing actually makes you think about what you are writing, so you understand it more :)

I understand why you would think im a copy and paster because of my low post count :P

Not really because of your low post count, but because a lot of people that start do it the wrong way by copy and pasting
