**SYLDD** - February 10, 2013, 5:23 pm

Hello HackForums, today I would like to share with you a neat tool to get your music from iTunes. To get the link, you will need to simply open itunes, go to the album you want, and navigate here to the arrowSpoiler [\(Click to View\)](#)

Once you hit that arrow, you will want to hit "Copy Link". That is the link you will paste into the program. Your program will be under iTunes Album Downloader.NET\Music AIO\obj\x86\Debug in the folder, just run the iTunesAlbumDownloader.

UPDATE!

Use This: <http://itunes.apple.com/linkmaker/>
