Nope, its a normal JDB, but its a very long FUD one.

I provide the buyers with a .com domain too.

Maybe ill ever get to the point to make a silent JDB

Cloud9™ - February 11, 2013, 11:13 am

Always good to see ANOTHER competitor.

Good luck with sales.

We weren't sales trashing, you were just getting butt hurt.

But i think you don't want me to refud the 4861 cve.

Its too old, and most people update their java once in a while.

So a normal JDB would probably be better.

The rates can vary.

jdb's are more used for ratting than sending traffic to em

Sending traffic would be pointless.

But people will much more likely run a jdb instead of a .exe file.

Also i can try to refud the sjdb but i can't guarantee.

20 minutes from 1st contact to getting installs - unbelievable service - I will buy any future products from him even if I don't need them.

\$25? For lifetime? Pffftt Beautiful. How much is YOUR time worth? Some of the best \$25 I ever spent, with the exception of that one time me and the guys went to Mexico, ran into those young ladies..but I digress.

Do. Not. Hesitate
