I'm not providing support for anything. Crypter isn't fud but can be re-fud, and the monetizer has some good anti-bans for adf.ly and a few other adf.ly copies.

Thy Shade - February 12, 2013, 11:16 pm

your using mega uploading . you from new zealand ?

Yaaaay! New Zealand! :D People actually know we exist :D

Thanks a bunch for this man, hopefully I will eventually get around to using it

GodOfCode - February 13, 2013, 11:09 am

I prefer Mega over mediafire or all the other upload sites, less ads and the downloads are faster.

Very true, I love the new megaupload.

Thanks for your share, is the monetizer source missing any online PHP files or something?

?

GodOfCode - February 13, 2013, 4:47 pm

Yea the moneytizer used a database that was in textfiles encrypted with base 64 (no php just normal .txt files hosted on a website) or you can just recode the login system to use mysql or something.

Yea, I am in the process of converting the project to c#, since I prefer that over vb, and I'm probably gonna fix it to use mysql. Just easier in the end.

??????? - February 13, 2013, 6:24 pm

I downloaded the Crypter source, I know how to easily FUD it but for me it's useless... Too many pointless options and cleaning up to do.

GodOfCode - February 14, 2013, 8:52 pm

Well experienced coders can have fun with it, and the moneytizer is great for newbies to vb.net.

moritezza - April 8, 2014, 2:56 pm

i know it is old post,
still you sell?

?????? - April 8, 2014, 3:55 pm

Dude, ??? /facepalm.

He isn't selling anything, he's giving out 2 sources.

Amen to those words my brotha! Amen!

?

GreyPhantom - May 7, 2014, 5:11 pm

Thanks for the Monetizing link dude! It might be a big help from me, I need money really. :P

Voidlight - May 7, 2014, 5:13 pm

Thanks for this. is this a run time source or just scantime?

EDIT: 300 posts
