Thread: [ASUS VH238H 23" LED Monitor - Lag-less gaming monitor, \\$120 AR from Amazon!](#)

dahrat - February 13, 2013, 7:04 am

Amazon just did a nice price drop yesterday morning on the ASUS VH238H 23" LED Monitor, along with a \$20 rebate. This is the LED backlit version of the venerable VH236H monitor, used for years in the EVO Fighting Game Championships because of having zero (or damn near close to zero) input lag. Perfect for fighting games or any precise/twitchy stuff.

I have that exact monitor. I got it a few months ago.

It's amazing for my 360 and plays games with nice quality. Worth the buy.
