Thread: [Torrent in HighSpeed Direct Download Link Conversion](#)[\[Free&legit\]](#)

Are you angry because everyone in the world can see your IP Address?

Is it dangerous in your country to download Torrents?

Send me your torrent file or magnetic link and I load it on a Server to get a High Speed Direct DL link and send it to you

Yeah, you can send me more than 1 Torrent to convert but dont send me Torrents with less than 10 Seeders

I think there is a website for it now (mainly for movies and tv series)

Link: [webtor.io](#)

I stumbled upon the site on reddit. I just searched how to stream magnet link and it was one of the comments on reddit. I checked out the developer from donate link and it was some developer I dont know. But better to do your own research before using is a better option.
