Like;

Code while true:

insert code here

Again, I have never coded javascript so I don't know how this would translate over.

I guess I'm to much of a noob to find the console tab lol because I can't figure it out yet and I'm using the latest version of firefox and would like to know what happens when i do this thing and also when i inspect element with firebug i found the console but when i do it i get this error HTTP "Content-Type" of "audio/mpeg" is not supported. Load of media resource <http://s3.amazonaws.com/moovweb-marketing/playground/harlem-shake.mp3> failed.
