Thread: [Words replaced with other words.](#)

Noob™ - February 16, 2013, 6:17 am

Why are certain words such as: Fagg0t(which is normally replaced with friend) and vict1m(which is normally replaced with slave) replaced? How is fuck or shit or cunt allowed but fagg0t isn't? Just wondering.

Ecca - February 16, 2013, 6:20 am

Lol, I never knew that faggot wasn't allowed

adampelletgun - February 16, 2013, 6:21 am

Only Omni knows why certain words are censored.

Omniscient does not want HackForums to be referred to as a place where you can get "vict1ms".

F@ggot is replaced because it's a pretty mean term. Using it can really put someone down. Honestly, I believe that out of all the curse words in the dictionary, F@GGOT is one of the worst I've heard.

Other words are replaced too.

If you haven't noticed, NIGG3R is replaced with Hannah Montana, or friend..I can't remember..I think omni changed it to friend but at one point it was Hannah Montana.

If you use the search function and look for word filters, I believe a member here did infact post a thread of all the filtered words.

(Feb 16, 2013 07:21 AM)adampelletgun Wrote: [\[CITE\]](#) Only Omni knows why certain words are censored.Not true, I remember a post he made concerning all the words that he blocked. Most of them were common courtesy and it was also for the sake of keeping HackForums clean

and out from being referred to as a blackhat site.

Revenge - February 16, 2013, 6:44 am

Some are filtered, some are not. I don't know as to why some of them are but a I know a few of them are from events that happened to stop people posting the same type of threads.

Yup, as when certain events happen the lounge is usually spammed to shit about it.

Omniscient gets tired of it and he puts a filter.

EX: There was a site that was copying HackForums, and everyone was posting about it like a goddamn idiot.

Omniscient put a filter on it and placed [removed] whenever the word was used.

Another Example would be when the lounge was spammed to shit when

MEGa- Up lo ad was shut down.

Everybody posted about it constantly, so omniscient did the same thing. He placed [removed] and of course made a sticky post in the lounge for a bit telling everybody to shut the fuck up before he rips everyone a new asshole.

+Pirate - February 16, 2013, 6:48 am

There's no need to call someone a f-got or n-ger besides to be flaming, so that's probably why.

Roxox1 - February 16, 2013, 6:56 am

Fagg0t is a slur for a gay person, using it in an offensive way can be considered homophobic
N1gger is racist.

VictIm makes it seem like a BH activity, which is not allowed.

Fuck, shit, cunt and all the others aren't actually offensive to a particular race, colour, language or sexuality.

Cyber Duck - February 16, 2013, 7:13 am

Megaupload gets replaced.

Faggot slave

Positive - February 16, 2013, 7:17 am

The censors are placed to prevent (help a little) flaming / harassment of other members.
